AIRMAN'S GUIDE

DIRECTORY OF AIRPORTS — Pages 21 through 76
RADIO FACILITY DATA — Pages 2 through 20
NOTICES TO AIRMEN — Pages 77 through 96

VOL. 6, NO. 4..... MAY 8, 1951

The AIRMAN'S GUIDE is issued every two weeks. This issue includes all data on record as of 0001 E.S.T. on the above date. For later information consult teletype NOTAMS.

The printing of this publication has been approved by the Director of the Bureau of the Budget, March 28, 1950

For sale by Superintendent of Documents, U.S. Government Printing Office Washington 25, D.C. - Price 25 cents per copy, $6.00 per year.

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
V = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W. . . Without voice facilities on range frequency
Z. . . . VHF station location marker at a range station.

RADIOTELEGRAPH CODE

A - ABLE	•—	F - FOX	••—•	K - KING	—•—	P - PETER	•——•	U - UNCLE	••—	Z - ZEBRA	——••

FREQUENCY LEGEND

V = 135.9,135.0 and 111.1 mc transmitted.
\# = Guards same VHF frequencies station transmits except 111.1 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105. 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)- 135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(5-8-51)

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR the weather minimums for this type of approach must be equal to, or better than the regular (R) minimums as listed in Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

STATION	TRANSMITS	WEA. MINIMUMS Alt MSL	Ceiling	Visibility	HOURS OF OPERATION REMARKS, ETC.

AIR FORCE GCA UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL AIR FORCE UNITS TRANSMIT ON AND GUARD THE FOLLOWING CHANNELS (FREQUENCIES): B=126.18; C=137.88; D=121.5; G=136.80; H=134.1; 142.02 mc: 3475. 4890 and 6640 kc.

STATION	Alt MSL	Ceiling	Visibility	HOURS OF OPERATION REMARKS, ETC.
Andrews AFB, Md.	529	250	1(D)1½(N)	Cont. 142.38
Barksdale AFB, La.	417	250	1(D)1½(N)	Cont IFR; 10-23 daily; 30 min notice other hrs.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.

(D) = Day. (N) = Night. → = New or revised data. ✓ = New facilities or name changes.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitivity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.

Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.

Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuels

A-: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airmen Section.

(k) "Dlkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. ← New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:

121.5				Military emergency

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

✓CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-139, Aug. 18, 1950. Erie, Penn., Port Erie Arpt. Initial apch S crs 3000' from intsxn E crs Youngstown rng.

(2) AL-187, Feb. 21, 1951. Harrisburg, Penn., Harrisburg State Arpt. Initial apch: W crs 1820' after passing New Kingstown FM (FINAL). Altitude over Harrisburg rng on final approach: 1820'.

(3) AL-286, Mar. 6, 1951. Poughkeepsie, N. Y., Dutchess Co. Airport. Initial approach E crs 3000' from intsxn SW crs Westover rng. W crs 3000' after passing Stewart rng. Shuttle, N crs to 3000' within 20 mi. Missed apch: climb to 3000' on N crs within 25 mi.

(4) AL-661, Jan. 26, 1951. Wilkes-Barre, Penn., Wilkes-Barre-Scranton Arpt. Initial apch N crs 3500' from intsxn SE crs Elmira rng; E crs 3500' from intsxn NW crs La Guardia rng; S crs 4000' from intsxn W crs Allentown rng; SW crs 4000' from intsxn E crs Williamsport rng.

(5) AL-458, Jan. 3, 1951. Wilmington, Del., New Castle Co. Airport. Missed approach: make a climbing left turn, climb to 1500' on S crs. Turn left as soon as practical to avoid holding pattern at Philadelphia LOM. Maintain 1500' until S of the New Castle rng.

(6) AL-117, Jan. 26, 1951. Des Moines, Iowa. Initial apch W crs 2600' from Omaha rng. Alternate missed apch procedure, when directed by ATC, climb to 2600' on W crs of Des Moines rng.

(7) AL-261, Oct. 11, 1950. Millinocket, Me. E crs realigned to 280°.

✓CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) AL-538, Oct. 30, 1950. Denver, Colo. NAS, Buckley Field. Magnetic bearing and dist. from Stapleton Fld to NAS Denver (Buckley) 107°, 7.9 miles.

(2) Forbes AFB, Topeka, Kansas. Initial apch from SW 2300' from intsxn NW crs Lebo rdo. Procedure turn: W side SW crs 2300' MSL within 25 miles. Alt over Forbes rdo on final apch 1800' MSL. Add alternate missed apch procedure No. 2 (when directed by ATC) climb to 2400' on NW crs.

(3) AL-117, Jan. 26, 1951. Des Moines, Iowa. Initial apch: W crs 2600' from Omaha rng. Alt missed apch procedure, when directed by ATC, climb to 2600' on W crs of Des Moines rng.

(4) AL-142, May 25, 1949. Everett, Wash., Paine Field. Initial apch: S crs 2500' from Seattle rng, 1400' after passing intsxn E crs Seattle Navy (FINAL).

(5) AL-491, May 31, 1949. Garden City, Kansas. Initial apch: S crs 4300' from intsxn NW crs Gage rng. Missed apch: climb to 4300' on S crs within 25 mi.

(6) AL-202, Aug. 3, 1949. Huron, S. D. Initial apch NE crs 3000' from Watertown rng. Missed apch: climb to 3000' on NE crs within 25 mi.

(5-8-51)

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous condition, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian terriroty.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no over-flights of foreign territory should be made without authorization from the foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtain countries.

✓DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed:

Radio Call	Frequency	Commissioned
Atlanta Center	120.3 mc	July 1, 1950
Boston Center	120.3 mc	Jan. 22, 1951
Chicago Center	120.3 mc	May 10, 1949
Cincinnati Center	120.3 mc	Mar. 28, 1951
Cleveland Center	120.3 mc	Nov. 3, 1950
Detroit Center	118.9 mc	Dec. 21, 1950
Kansas City Center	120.3 mc	Feb. 8, 1951
New York Center	120.3 mc	Oct. 11, 1950
	120.7 mc	Jan. 25, 1950
Oakland Center	120.3 mc	Oct. 30, 1950
Pittsburgh Center	118.9 mc	Nov. 2, 1950
St. Louis Center	118.9 mc	Mar. 15, 1951
Salt Lake Center	120.3 mc	Jan. 24, 1951
San Antonio Center	120.3 mc	April 17, 1951
Seattle Center	120.3 mc	March 8, 1951
Washington Center	120.3 mc	Sept. 1, 1949

VHF OMNITEST SIGNAL FACILITIES: Experimental VHF omnitest signal facilities have been installed at the New York (LaGuardia 112.0 mc), Chicago (Midway 112.0 mc), and Kansas City (Municipal 113.0 mc) airports. These facilities cannot be used for navigational purposes but permit checking of aircraft navigational VOR receivers during a ramp test or while in flight near the airport. Voice communication is not available on the test signal frequency. The facility radiates a 0° course in all directions with a power output of about 10 watts. The identification consists of continuous dots without voice. Each facility is continuously monitored and will shut down automatically if the 0° course varies by more than one degree from normal or in case the identification fails. Flight checks indicate that the omnitest signal is usable to a distance of about ten miles at minimum instrument altitude although regions of weak and unreliable signal may be encountered at shorter distances. The omnitest signal may be regarded as dependable when there is no flag alarm showing or where no flag alarm is incorporated in the aircraft unit and the identification is received free from interference and noise. Comment from airmen will be appreciated. Please forward same to: Civil Aeronautics Administration, Washington 25, D. C., Attention: W-380.

RECEIVER OMNITEST PROCEDURE - Receivers with omni-Bearing Selectors (OBS)

Tune in omnitest frequency. The "To-From" indicator should read "To" or "From" and the alarm flag, if one is used, should disappear.

Set OBS in vicinity of 0° to center "Deviation" indicator. The "To-From" indicator should read "From" and the difference between 0° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

Set OBS in vicinity of 180° to again center "Deviation" indicator. The "To-From" indicator should read "To" and the difference between 180° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

With the "Deviation" indicator centered in the 180° position rotate OBS clockwise until "Deviation" indicator reads full scale or five dots to left. Note OBS reading. Next rotate OBS counterclockwise until "Deviation" indicator reads full scale or five dots to right. Note OBS reading. The difference between the two OBS readings is a measure of receiver course sensitivity.

If instrumentation includes a radio magnetic indicator (RMI), the pointer on this instrument connected to the receiver being checked should be observed. This pointer should indicate 180° ± 1 degree regardless of the setting of the OBS.

AUTOMATIC INDICATING RECEIVERS: Automatic indicating receivers do not have an Omni-Bearing Selector or a "To-From" indicator and have no ambiguity. The only cours that can be checked is the one indicated when the equipment is receiving the 0° (magnetic north) radial from the station, which is automatically indicated when the receiver is turned on and tuned to the correct signal frequency. Either 0° or 180° will be indicated depending on the sensing designed into the particular receiving equipment (as described in the instruction book for that equipment).

√AIR ROUTE TRAFFIC CONTROL AREA BOUNDARY AMENDMENT: Effective immediately, the ST. LOUIS-MEMPHIS air route traffic control area boundary on Blue airway 6 is established 20 miles SW of the Farmington VOR.

√CORRECTION TO AERONAUTICAL CHART: Correct RF Chart No. 27A dated February 28, 1951 by deleting the frequency 120.3 mc from the Oakland Tower. Is shown correctly in remarks column.

√THE FOLLOWING BEACON SITES WILL BE DISCONTINUED ABOUT MAY 14:

FTW-ICT	SITE
Wayne, Okla.	14B
NEW-STL	
Covington, La.	3
BRO-FTW	
Greytown, Texas	25
DAL-LOU	
Gurdon, Ark.	23
CRP-HOU	
Bay City, Texas	12

ELP-FTW	SITE
Hudspeth, Texas	4

PHX-ELP	
Old Hachita, N. Mex.	29A
Hoppe Ranch, N. Mex.	33
ELP-PUB	
Anthony, N. Mex.	1
Vado, N. Mex.	2
Bosquicito, N. Mex.	15
Bernardo, N. Mex.	19

√DANGER AREA DESIGNATIONS: The following Danger Area amendments shall be effective as dated, unless otherwise advised:

AMENDMENT NO. 70 (May 10, 1951)

(1) The El Centro, California, area, published on April 21, 1949, in 14 F. R. 1913, is amended by changing the "Designated Altitudes" column to read: "Surface to unlimited".

(2) The Fort Ord, California, area, published on April 21, 1949, in 14 F. R. 1913, and amended on November 10, 1950, in 15 F. R. 7548, is further amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 36-41-49, long. 121-48-19; SE to lat. 36-37-35, long. 121-41-17; SSW to lat. 36-34-54, long. 121-43-01; westerly to lat. 36-34-30, long. 121-47-40; counterclockwise along the arc of a circle 3 mile radius, centered at lat. 36-35-30, long. 121-50-30 to lat 36-38-00, long. 121-50-20; westerly to lat. 36-38-15, long. 121-51-45; NNE to lat. 36-42-00, long. 121-49-45; SE to lat. 36-40-59, long. 121-48-49; easterly to lat. 36-41-49, long. 121-45-19, point of beginning.

(3) The Trona, California, area, published on April 21, 1949, in 14 F. R. 1913, and amended on November 3, 1949 in 14 F. R. 6676, is further amended by changing the "Time of Designation" column to read: "Continuous".

(4) The Osage City, Kansas, area, published on June 23, 1949, in 14 F. R. 3393, is deleted.

(5) The Scenic, South Dakota, area, published on April 21, 1949, in 14 F. R. 1913, and amended on October 29, 1949, in 14 F. R. 6596, is further amended by changing the "Designated Altitudes" column to read: "Surface to 40,000 feet".

(6) The Corpus Christi, Texas, area, published on April 21, 1949, in 14 F. R. 1913, is amended by changing the "Description by Geographical Coordinates" column to read: "Beginning at lat. 27-49-20, long. 97-00-00; southerly, 3 nautical miles from and parallel to the shoreline to lat. 26-15-00, long. 97-07-20; due W to long. 97-26-00; NNW to lat 27-17-30, long. 97-48-30; WSW to the E edge of Amber Airway No. 4 at lat. 27-16-30, long. 97-51-15; northerly and northeasterly along the E edges of Amber Airway No. 4 and Blue Airway No. 30 to lat 27-42-00, long. 97-33-00; counterclockwise along the arc of a circle 3 miles in radius, centered at Cuddihy Field (lat. 27-43-15, long. 97-30-30) to lat. 27-40-30, long. 97-29-40; NE to lat. 27-47-00, long. 97-20-00; ENE to lat. 27-49-30, long. 97-07-30; counterclockwise along the arc of a circle 3 miles in radius, centered at Port Aransas Airport (lat. 27-49-45, long. 97-04-30) to lat. 27-49-30, long. 97-01-30; easterly to lat. 27-49-20, long. 97-00-00, point of beginning.

(7) The Maili Point, Island of Oahu, Territory of Hawaii, area, published on April 29, 1950, in 15 F. R. 2435, is deleted.

AMENDMENT NO. 71 (May 19, 1951)

(1) The Ajo, Arizona, area, published on February 14, 1950, in 15 F. R. 792, amended on May 14, 1950, in 15 F. R. 2874, and on November 18, 1950, in 15 F. R. 7873, is revised to read: Location: Ajo (Phoenix, San Diego and Douglas Charts); Description: Beginning at lat. 32-50-30, long. 112-48-00; due S to lat. 32-48-30; southerly along Arizona Highway No. 85 to lat. 32-31-00, long. 112-53-00; due W to long. 112-57-00; due S to lat. 32-20-00; due W to long. 113-00-00; due S to the Mexican border at lat. 31-56-00; WNW along the Mexican broder to lat. 32-23-45, long. 114-28-30; due N to lat. 32-39-40; easterly to lat. 32-40-45, long. 114-18-20; easterly along the Southern Pacific Railroad and U. S. Highway No. 80 to lat. 32-45-30, long. 113-37-30; easterly to lat. 32-50-30, long. 112-48-00, point of beginning; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: 1st Fighter Interceptor Wing, George AFB, Victorville, Calif.

(2) The Warren Grove, New Jersey, area, published on August 18, 1949, in 14 F. R. 5144, is amended by changing the "Designated Altitudes" column to read: "Surface to 20,000 feet" and by changing the "Using Agency" column to read: "NAS, Atlantic City, New Jersey".

(3) The Lake Ontario (Wilson), New York, area, published on November 3, 1949, in 14 F. R. 6676, and amended on December 14, 1949, in 14 F. R. 7479, on April 29, 1950, in 15 F. R. 2435, and on October 14, 1950, in 15 F. R. 6907, is revised to read: Location: Lake Ontario (Wilson) (Detroit Chart); Description: Beginning at lat. 43-18-40, long. 78-51-30; due N to lat. 43-22-00; due W to long. 78-55-00; SSE to lat. 43-18-30, long. 78-54-00; E to lat. 43-18-40; long. 78-51-30; point of beginning.; Altitudes: Surface to 2000 feet; Time: Daylight hours only, from May 19, 1951 through December 31, 1951; Using Agency: Cornell Aeronautical Laboratory and Stanley Aviation Corp., Buffalo, New York.

√CONTROL AREA, CONTROL AREA EXTENSION AND CONTROL ZONE AMENDMENTS: Effective 0001 EST, May 29, 1951, unless otherwise advised, control areas, control area extensions and control zones are amended in whole or in part as follows:

(1) CONTROL AREAS: (1) Green civil airway No. 5 control areas (Los Angeles, Calif. to Boston, Mass.) is amended by adding the following portion to present control areas: From the Memphis, Tenn. omnirng stn to the Jackson, Tenn. omnirng stn via the direct enroute and 15° SE alt change radials; from the Jackson, Tenn. omnirng stn to the Graham, Tenn. omnirng stn via the direct enroute and 15° SE alt change radials; from the Graham, Tenn. omnirng stn to the Nashville, Tenn. omnirng stn via the direct enroute radials; from the Nashville, Tenn. omnirng stn to the Pikeville, Tenn. omnirng stn via the direct enroute and 15° N alt change radials; from the Pikeville, Tenn. omnirng stn to the Knoxville, Tenn. omnirng stn via the direct enroute and 15° S alt change radials, including all that area bounded on the N by Green civil airway No. 5 and on the S by the Pikeville-Nashville and the Pikeville-Knoxville direct enroute radials.

(5-8-51)

(2) Amber civil airway No. 4 control areas (Brownsville, Texas to Minot, N. Dak) is amended by adding the following portion to present control areas: From the Aberdeen, S. Dak. omnirng stn to the Bismarck, N. Dak. omnirng stn via the direct enroute and 15° SW alt change radials; from the Bismarck, N. Dak. omnirng stn to the Minot, N. Dak. omnirng stn via the direct enroute radials.

(3) Amber civil airway No. 6 control areas is amended to read: (Jacksonville, Fla. to United States-Canadian Border). All of Amber civil airway No. 6 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the alt change and enroute radials from the Jacksonville, Fla. omnirng stn to the Alma, Ga. omnirng stn via the direct enroute and 15° SW alt change radials; from the Alma, Ga. omnirng stn to the Macon, Ga. omnirng stn via the direct enroute and 15° NE alt change radials. From the Chattanooga, Tenn. omnirng stn to the Nashville, Tenn. omnirng stn via the direct enroute and 15° SW alt change radials excluding that portion which overlaps the Camp Forest danger area; from the Nashville, Tenn. omnirng stn to the Bowling Green, Ky. omnirng stn via the direct enroute and 15° E alt change radials, including all that area bounded on the SW by Blue civil airway No. 3, on the NW by Amber civil airway No. 5 and on the E by the Nashville-Bowling Green omnirng direct enroute radials.

(4) Amber civil airway No. 7 control areas are amended to read: (Key West, Fla. to U. S. Canadian Border). All of Amber civil airway No. 7 including all that area within 5 miles either side of the the enroute and alt change radials and the area between the alt change and enroute radials from the West Palm Beach, Fla. omnirng stn to the Vero Beach, Fla. omnirng stn via the direct enroute and 15° E alt change radials; from the Vero Beach, Fla. omnirng stn to the Daytona Beach, Fla. omnirng stn via the direct enroute and 15° W alt change radials; from the Daytona Beach, Fla. omnirng stn to the Jacksonville, Fla. omnirng stn via the direct enroute and 15° E alt change radials; from the Jacksonville, Fla. omnirng stn to the Brunswick, Ga. omnirng stn via the direct enroute radials; from the Burnswick, Ga. omnirng stn to the Savannah, Ga. omnirng stn via the direct enroute and 15° E alt change radials; from the Savannah, Ga. omnirng stn to the Charleston, S. C. omnirng stn via the direct enroute and 15° NE alt change radials; from the Charleston, S. C. omnirng stn to the Florence, S. C. omnirng stn via the direct enroute and 15° E alt change radials; from the Florence, S. C. omnirng stn to the Lumberton, N. C. omnirng stn via the direct enroute radials; from the Lumberton, N. C. omnirng stn to the Raleigh, N. C. omnirng stn via the direct enroute and 15° E alt change radials.

(5) Red civil airway No. 10 control areas are amended to read: (Pueblo, Colo. to Charleston, S. C.) All of Red civil airway No. 10 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Monroe, La. omnirng stn to the Jackson, Miss. omnirng stn via the direct enroute and 15° S alt change radials; from the Jackson, Miss. omnirng stn to the Meridian, Miss. omnirng stn via the direct enroute and 15° S alt change radials; from the Meridian, Miss. omnirng stn to the Tuscaloosa, Ala. omnirng stn via the direct enroute and 15° NW alt change radials. From the Augusta, Ga. omnirng stn to the Charleston, S. C. omnirng stn via the direct enroute and 15° S alt change radials.

(6) Red civil airway No. 16 control areas are amended to read: (Tallahassee, Fla. to Florence, S. C.): All of Red civil airway No. 16 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Tallahassee, Fla. omnirng stn to the Albany, Ga. omnirng stn via the direct enroute and 15° W alt change radials; from the Albany, Ga. omnirng stn to the Macon, Ga. omnirng stn via the direct enroute and 15° W alt change radials. From the Augusta, Ga. omnirng stn to the Columbia, S. C. omnirng stn via the direct enroute radials; from the Columbia, S. C. omnirng stn to the Florence, S. C. omnirng via the intsxn of the Columbia, S. C. omnirng 92° true and the Florence, S. C. omnirng 226° true enroute radials.

(7) Red civil airway No. 25 control areas are amended to read: (Tallahassee, Fla. to Miami, Fla.) All of Red civil airway No. 25 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Tallahassee, Fla. omnirng stn to the Cross City, Fla. omnirng stn via the direct enroute and 15° SW alt change radials; Cross City, Fla. omnirng stn to the Tampa, Fla. omnirng stn via the intsxn of the Cross City, Fla. omnirng 154° true and the Tampa, Fla. omnirng 13° true enroute radials including all that area bounded on the E and NE by Red civil airway No. 25 and on the SW by the Cross City 154° true enroute radial and including all that area bounded on the E by Red civil airway No. 25 and on the NW by the Tampa 13° True enroute radial and on the SW by the Tampa-Fort Myers direct enroute radial; from the Tampa, Fla. omnirng stn to the Fort Myers, Fla. omnirng stn via the direct enroute and 15° W alt change radials; from the Fort Myers, Fla. omnirng stn to the Miami, Fla. omnirng stn via the direct enroute and 15° SW alt change radials.

(8) Red civil airway No. 30 control areas are amended to read: (Shreveport, La. to Jacksonville, Fla.) All of Red civil airway No. 30 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Mobile, Ala. omnirng stn to the Crestview, Fla. omnirng stn via the intsxn of the Mobile omnirng 70° true and the Crestview omnirng 274° true enroute radials; from the Crestview, Fla. omnirng stn to the Marianna, Fla. omnirng stn via the direct enroute and 15° N alt change radials; from the Marianna, Fla. omnirng stn to the Tallahassee, Fla. omnirng stn via the direct enroute radials.

(9) Red civil airway No. 31 control areas (Denver, Colo. to Minneapolis, Minn) is amended by adding the following portion before Rapid City, S. Dak. omnirng stn to read: from the Cheyenne, Wyo. omnirng stn to the Chadron, Nebr. omnirng stn via the direct enroute and 15° SE alt change radials including all that area bounded on the E by Red civil airway No. 31 on the S by Green civil airway No. 3 and on the NW by the Cheyenne-Chadron direct enroute radials and all that area bounded on the E and SE by Red civil airway No. 31 and on the NW by the Cheyenne-Chadron direct enroute radials; from the Chadron, Neb. omnirng stn to the Rapid City, S. Dak. omnirng via the direct enroute and 15° W alt change radials;.....

(10) Red civil airway No. 46 control areas are amended to read: (Jamestown, N. Dak. to Rochester, Minn.) All of Red civil airway No. 46 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Jamestown, N. Dak. omnirng stn to the Aberdeen, S. Dak. omnirng stn via the direct enroute radials; from the Aberdeen, S. Dak. omnirng stn to the Watertown, S. Dak. omnirng stn via the direct enroute and 15° N alt change radials.

(11) Blue civil airway No. 3 control areas are amended to read: (Tallahassee, Fla. to Sault Ste Marie, Mich.) All of Blue civil airway No. 3 from the Tallahassee, Fla. rdo rng stn to a point 25 miles N of the Pellston, Mich. non-directional rdo bcn, including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Muscle Shoals, Ala. omnirng stn to the Graham, Tenn. omnirng stn via the direct enroute and 15° W alt change radials.

(12) Blue civil airway No. 5 control areas are amended to read: (Galveston, Texas to Salina, Kansas) All of Blue civil airway No. 5 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Bryan, Texas omnirng stn to the Waco, Texas omnirng stn via the direct enroute and 15° E alt change radials; from the Waco, Texas omnirng stn to the Dallas, Texas omnirng stn via the direct enroute and 15° E alt change radials; from the Dallas, Texas omnirng stn to the Ardmore, Okla. omnirng stn via the direct enroute radials. From the Oklahoma City, Okla. omnirng stn to the Ponca City, Okla. omnirng stn via the direct enroute radials; from the Ponca City, Okla. omnirng stn to the Wichita, Kans. omnirng stn via the direct enroute radials.

(13) Blue civil airway No. 13 control areas (Houston, Texas to Minneapolis, Minn.) is amended by changing last sentence to read: from the Kansas City, Mo. omnirng stn to the Lamoni, Iowa omnirng stn via the direct enroute and 15° E alt change radials; from the Lamoni, Iowa omnirng stn to the Des Moines, Iowa omnirng stn via the direct enroute and 15° E and W alt change radials.

(14) Blue civil airway No. 28 control areas are amended to read: (Charleston, S. C. to Spartanburg, S. C.) All of Blue civil airway No. 28 including all that area within 5 miles either side of the enroute and alt change radials and the area between the alt change and enroute radials from the Charleston, S. C. omnirng stn to the Columbia, S. C. omnirng stn via the direct enroute and 15° NE alt change radials; from the Columbia, S. C. omnirng stn to the Spartanburg, S. C. omnirng stn via the direct enroute and 15° NE alt change radials.

CONTROL AREA EXTENSIONS: Control area extension (Fort Allen, Kauai, T. H.) is added to read: All that area within a radius of 25 miles from the Port Allen rdo rng stn extending clockwise from the N crs of the Port Allen rdo rng to Red civil airway No. 87.

CONTROL ZONES: (1) 3-mile control zone section is amended by adding the following arpt: Gooding, Idahh, Gooding Municipal Arpt.

(2) Tampa, Fla. control zone is amended to read: Within a 5 mile radius of Tampa International Arpt extending 2 miles either side of a line from that arpt to the Tampa rdo rng stn and extending 2 miles either side of the SE crs of the Tampa rdo rng to a point 10 miles SE of the rdo rng stn, and within a 5 mile radius of the Pinellas County Arpt extending 2 miles either side of a line from that arpt to the Tampa Rdo rng stn.

CIVIL AIRWAY, CONTROL AREA, CONTROL AREA EXTENSION, CONTROL ZONE AND REPORTING AMENDMENTS: Effective 0001 EST, May 12, 1951, unless otherwise advised, civil airways, control areas, control area extensions, control zones and reporting points are amended in whole or in part as follows:

CIVIL AIRWAYS: (1) Red civil airway No. 35 is amended by changing caption to read: (Pueblo, Colo. to St. Joseph, Mo.) and by changing portion after Hutchinson, Kans. rdo rng stn to read: the intsxn of the E crs of the Hutchinson, Kans. rdo rng and the SW crs of the Forbes AFB (Topeka, Kans.) rdo rng; Forbes AFB rdo rng stn to the intsxn of the NE crs of the Forbes AFB rdo rng and the S crs of the St. Joseph, Mo. rdo rng.

(2) Blue civil airway No. 82 is added to read: (Lebo, Kans. to Topeka, Kans.) From the Lebo, Kans. rdo rng stn to the Forbes AFB rdo rng stn, Topeka, Kans.

CONTROL AREAS: (1) Red civil airway No. 35 control areas is amended by changing caption to read: (Pueblo, Colo. to St. Joseph, Mo.).

(2) Blue civil airway No. 82 control areas is added to read: (Lebo, Kans. to Topeka, Kan All of Blue civil airway No. 82.

CONTROL ZONES: (1) Topeka, Kans. control zone is amended by adding the following to the present control zone: including a 5 mile radius of Forbes AFB, Topeka, Kans. extending 2 miles either side of the SW crs of the Forbes AFB rdo rng to a point 10 miles SW of the rdo rng stn.

REPORTING POINTS: (1) Red civil airway No. 35 is amended by changing the caption to read: (Pueblo, Colo. to St. Joseph, Mo.).

(2) Blue civil airway No. 82 is added to read: (Lebo, Kans. to Topeka, Kans.) No reporting designation.

NOTE: Notification by All Service A circuits NOTAM dated May 7, 1951.

IMPENDING CHANGES IN AERONAUTICAL DISTANCE AND SPEED UNITS

All CAA air-ground communications within the continental United States and Alaska will change over to the use of nautical miles for horizontal distance and visibility and knots for horizontal speed on July 1, 1952. These changes are necessary in order to conform to international practices.

Basically, a nautical mile is the length of a minute of latitude at sea level, or the length of a minute of longitude at sea level at the equator. This distance is 6,080.20 feet, as compared to 5,280 feet for the common or statute mile. Since the ratio 6,080/5,280 is equal to 1.15, and the ratio 5,280/6,080 is equal to .87, it is apparent that the number of statute miles is 115% of the number of nautical miles, or the number of nautical miles is 87% of the number of statute miles. Furthermore, if the fraction 6,080/5,280 is reduced to lowest terms, we obtain 38/33, indicating that 38 statute miles are equal to 33 nautical miles.

Furthermore, practically all air navigational computers provide quick and easy conversions of nautical miles to statute miles, or vice versa, so no difficulties should be experienced by anyone who will attempt to inform himself as to the relationship of the units and with at least one of the various methods of conversion. Attention is specifically called to the fact that the knot is a unit of speed and not a unit of distance, being equal to nautical miles per hour.

Conversion Tables for Statute and Nautical Miles
(To the nearest hundredth)

1 nautical mile = 6,080.20 ft. 1 statute mile = 5,280.00 ft.

Statute - Nautical		Nautical - Statute	
1	0.87	1	1.15
2	1.74	2	2.30
3	2.61	3	3.45
4	3.47	4	4.61
5	4.34	5	5.76
6	5.21	6	6.91
7	6.08	7	8.06
8	6.95	8	9.21
9	7.82	9	10.36
10	8.68	10	11.52
20	17.37	20	23.03

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (3-19)
ANNISTON-RADIO: Omnirng gnd checked only. (4-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (1-30)
**BIRMINGHAM ARPT: Apr. 30, hi-intensity apch lgts on SW end of Rnwy 6-24 commd. 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy two high intensity rnwy lgts are lctd in center of black top rnwy. E/W and NE/SW Sod Strips clsd (const). (4-20) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
HUNTSVILLE ARPT: Use N/S Rnwy only. (1-12)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and. lgts give impression of parallel rnwys. (9-20)
MONTGOMERY-RADIO: Apr 20, omnirng shut down until approx May 25 - modernization.
MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 18-36 inop. (3-19)
**OZARK AAF: Correct lat 31-17-00, long. 85-43-00. (3-7)
TUSCALOOSA-RADIO: About May 15, omnirng will be shut down until approx July 15. (4-20)

[redacted]: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (4-2)
FLORENCE: Mortar firing will be conducted in rectangular area approx 2 mi NNE on May 20 and 27, with trajectory up to 7000' above terrain. Area is defined as follows: N bndry: lat 33-09-30; S bndry: lat 33-03-30; E bndry: long 111-19-00; W bndry: long 111-22-30.
LUKE AFB (PHOENIX): Ctn - exten const all rnwys. (2-19) Rnwy 3-21 clsd (const). (5-2)
PHOENIX-SKY HARBOR ARPT-TOWER: From Mar 26, until approx June 26, rdo equip being moved to new twr. During this period short interruptions. (3-14)
ARKANSAS: BENTON ARPT: W half N/S Strip clsd (const). (2-7)
BENTONVILLE ARPT: 51' bcn twr being erected 3 side adj to N end of hangar. (4-13)
BRINKLEY ARPT, SITE 37, DAL-LOU: Clsd ngts. Water in center of strip intsxn. Rows of dirt on SW end NE/SW Strip. (1-4)
CLARKSVILLE ARPT: E/W Strip clsd. (2-12)
**DE WITT-COMMERCIAL ARPT: Correct lat 34-17-30, long. 91-23-15. (11-10)
FT. SMITH ARPT: Equip on W end E/W Rnwy. (4-9)
LITTLE ROCK-ADAMS FLD-TOWER: Transmission and reception poor on all VHF freqs
** S to W account obsts near temp twr until approx May 15, 1951. Apch ctl on 353 kc shut down until approx May 15. (3-7) FLD: Correct lat 34-43-45, long. 92-14-00. (2-14) Use ctn lndg NE or N, vision of ctl twr partially obstructed. (3-10) Lmtd NG svcg avail. (10-24
MANILA ARPT: Clsd (const). (3-4)
PINE BLUFF-RADIO: Omnirng flgt-checked May 4, oper normal. (5-5)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
WALNUT RIDGE ARPT: Grading adj NW/SE Rnwy and N half N/S Rnwy. (3-22)
[redacted]: ★ALAMEDA NAS-RADIO: Navy Mil Arwys Stn transmits and gds 3000 kc in emerg. (5-3)
ARCATA ARPT: Ctn - const days. Use rnwys only. (2-7)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft except on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CASTLE AFB (MERCED)-RADIO: USAF LF rng flgt-checked, crss correctly aligned. (4-20)
CASTLE AFB (MERCED): Acft parked on lndg mat. Use rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (3-13)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CULVER CITY-HUGHES ARPT: Entire fld clsd xcpt NW half Rnwy 4-22. Usable portion mrkd day, ngt. Clsd trans acft xcpt on prior permission. (3-9)
**DUNSMUIR-MOTT ARPT, SITE 25B, SFO-SEA: Delete clsd winter. (5-8) These data rcvd too late for inclusion in Directory of Arpts.
EDWARDS AFB (MUROC): Lctd within a danger area. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (4-23)
★EL CENTRO NAAS-RADIO: Navy Mil Arwys Stn transmits and gds 4765 kc; 132.3,137.88, 121.5,142.74 mc. Voice call: El Centro Arwys. Hrs of oper: Cont. (4-24)
**FORT ORD (MONTEREY) FLD: Correct lat 36-39-00, long. 121-48-30. (12-6)
FORT ORD (MONTEREY) FLD: P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
FRESNO AIR TERMINAL-TOWER: Effective May 11, twr hrs of opern: 0700-2300 daily. (4-27)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (3-11)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
HAMILTON AFB (SAN RAFAEL)-RADIO: Temp compass locator operg on 219 kc has been installed at lat 38-02-56, long. 122-29-44. Oper with voice and ctld by twr. Bear., dist to Rnwy 30: 300°, 1300'. Oper cont. (4-9)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (4-5)
**LA MESA-SWEETWATER ARPT: Reinstated. Lat 32-41-30, long. 117-02-15. (3-19)
LONG BEACH-EAST LONG BEACH ARPT: Strip 21 under const. Use oiled area for lndg and take-offs. (3-28)
LOS ANGELES INTERNATIONAL ARPT-TOWER: Effect. Apr 9 until approx June 8, voice communs may be interrupted for short periods during new twr const. About May 14 until [redacted]: approx May 23, ASR and PAR will be inop. Temp ILS lclzr channel "Y" 109.9 mc serves Rnwy 25L. Ident: LAX. Crs aligned on centerline. (4-11) About May 7, perm. lclzr will be comm. (4-11) FLD: Rnwy 4-22 clsd (const). Rnwy 7L-25R usable portion 4500' from apch end 25R. Const across W end Rnwy 25R. 100' crane and equip. on and adj const area. Use paved areas only. Two green traverse bar lgts mrk threshold Rnwy 25L. Rnwy 25R clsd take-offs. Rnwy 7L clsd lndgs 0700-1700 daily except Sat and Sun. Const new twr approx 1/2 mi of tfc pat S of Arpt not visible to twr controllers. (4-11)
★MARCH AFB (RIVERSIDE)-RADIO: USAF VHF/DF also opers on 136.8 mc. (4-23)
MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. (1-15)
MATHER AFB-TOWER: USAF GCA inop. (4-25)
★McCLELLAN AFB (SACRAMENTO)-RADIO: Correct coordinates USAF H fac: lat 38-43-34, long. 121-23-59. (4-19)
★MOFFETT NAS (MTN. VIEW)-RADIO: Navy Mil Arwys Stn no longer transmits or gds 6385 kc. (4-26)
MOFFETT NAS (MTN. VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21)
★MONTEREY NAAS-RADIO: Navy homing fac voice call: Navy Monterey Rdo. (5-2)
NORTON AFB (SAN BERNARDINO): Ctn - equip on fld days. (3-29)
OAKLAND-RADIO: Omnirng maximum usable dist, 40 mi N thru E at minimum instr alt. (2-28)
OAKLAND ARPT: Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. (3-8)
**OROVILLE ARPT: 36" double end, clear and green, rot bcn commd and opers dusk-dawn (4-24)
SAN DIEGO-RADIO: Omnirng operg on test-basis, awaiting flgt-check. (5-4)
**SUSANVILLE ARPT: Apr 30, 24" bcn commd.
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. No opers Sat, Sun, or holidays. (4-30)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft land on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (2-21)
SAN DIEGO-NAS SEAPLANE BASE: Sealane mrkrs under const. Perm pile-mounted day mrkrs and seadrome lgts are being installed in S San Diego Bay to delineate the sealanes. There are two sealanes each 1000' wide, extending NW/SE, 14, 875'; E/W, 9,872'. Bndrys and ends of lanes mrkd, day, ngt. Ctn during lndg and take-off. It is also noted that due to mrkrs being pile-mounted the height above water will vary with the state of the tide.
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)
SAN FRANCISCO-RADIO: Omnirng on 117.6 mc may be unreliable due to const of pipeline in vcnty of transmitter. Limited communication possible on 122.1 mc because of blocking interference from another freq. (1-26)
SAN FRANCISCO ARPT-TOWER: CAA ILS Lclzr operg with slight scalloping. (1-26) FLD: Apch lgts inop. Rnwys clsd days intermittently. Turf area clsd. Equip on fld. (1-26) Const on apron adj Intnl Trml, mrkd. Taxi with ctn. (3-21)
★SANTA BARBARA-RADIO: Bear., dist LF rng to Santa Barbara Arpt: 74°, 2.1 mi. (4-26) About May 14, visual-aural rng will be shut down until approx May 21 for crs realignment as follows: 49 BN 139 NY 229 YA 319 AB. (5-1)
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end of Rnwy 25 perm clsd to acft with 20,000 lbs or more gross wt. Threshold lgts Rnwy 7 inop. Extension apch end Rnwy 7 usable days only. (4-11)
SANTA MONICA ARPT: 16" elevated lgts being installed both sides Rnwy 3-21. Rnwy 4-22 clsd. Rnwy 3-21 hazardous - const. (3-29)
[redacted]: COLORADO-SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U.S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (9-25)
DENVER-RADIO: About May 25, transmitter and rcvr 121.5 mc will be commd. (4-20)
DENVER-AIR ROUTE TRAFFIC CONTROL CENTER: About May 15, transmitter and rcvr 120.3 mc will be comm. (4-6)
★DENVER NAS(BUCKLEY FLD)-RADIO: Navy Mil Arwys Stn transmits and gds 6290 kc voice; 8770 CW. Voice Call: Navy Denver Rdo. Hrs of opern: On 30 min req during working days; on 2 hr prior req at other times. Navy X-band Radar Bcn, code 2-1-1, inop. (4-26)

COLORADO: DENVER-STAPLETON ARPT-TOWER: About May 8, 119.5 mc will be implemented. (5-4)
EAGLE-RADIO: About May 10, LF voice fac 209 kc will be changed to 391 kc. (4-13)
PUEBLO: Ordnance depot approx 17 mi E at lat 28-16-53, long. 104-18-09, conducting all types of demolition work 0800-1630 daily, Mon thru Fri, during month of May. (4-9)
PUEBLO ARPT-TOWER: Soon transmitter and rcvr on 121.5 mc will be comm. (5-7)
THURMAN-RADIO: Omnirng will be shut down for a 15 min period between 1000 and 1100 each day until approx May 21. (5-2)
CONNECTICUT: BRIDGEPORT ARPT: Const ends Rnwys 6, 11 and 16. First 1000' of these rnwy ends subject to closure with min notice. Equip on fld. (4-14)
E. HARTFORD-RENTSCHLER ARPT: VFR flgt test opers days all alts in 75 mi radius. 12' lgtd bldg on W bndry 471' from centerline NE/SW Rnwy. (3-16)
HARTFORD-RADIO: Auto. rng monitor. discontd. (2-21)
NEW HAVEN ARPT: Ctn-use rnwys only. Extn const. Equip. on fld. Advance notice rqrd for ngt opern. June 10, 0800-2000 fld will be clsd to all acft xcpt scheduled carriers. (5-2)
DELAWARE: DOVER AFB-RADIO: USAF rng gnd-checked only. Reliable for homing only. (12-12)
DOVER AFB: No svcg trans acft. (9-14)
FORT MILES: Overwater controlled Firing Area in vcnty formerly approved on a seasonal basis, is now rqrd on a yearly basis. Area is described as follows: Beginning at lat 38-45-30, long. 75-01-24; SE to lat 38-43-00, long. 74-57-10; SSE to lat 38-38-50, long. 74-55-33; W to lat 38-37-54, long. 75-03-50; northerly along the shoreline at lat 38-40-45, long. 75-04-09; NE to point of beginning. Time of Use: Jan to April 0800-1730, May to Oct 1300-1900, Nov to Dec 0800-1730. Activities: Anti-acft firing. Controlling Agency: 2nd Army, Ft. Miles, Dela. Effective Date: Jan 5, 1951.
WILMINGTON-RADIO: Soon Z mrkr will be shut down until approx May 11 - modernization. (4-23)
WILMINGTON-NEW CASTLE CO. ARPT: Jets and other mil acft operg daily. Two 465' unlgtd bridge twrs being erected across Delaware Riv 4 mi ENE. (3-23)
DIST. OF COLUMBIA: DIST. OF COLUMBIA-SPECIAL NOTICE: ON MAY 19, 1951, BETWEEN HRS OF 1300-1730 EDT, THERE WILL BE A HVY CONCENTRATION OF ACFT PARTICIPATING IN ARMED SERVICES DAY AERIAL DEMONSTRATIONS IN AN AREA E OF POTOMAC RIVER, BETWEEN FT. WASHINGTON OVER BOLLING AFB AND N TO RIVERDALE, MD., AT ALT OF 1000' AND ABOVE. ALL ACFT SHOULD AVOID THIS AREA AND REMAIN WELL W OF THE POTOMAC RIVER. ACFT LNDG AT WASHINGTON NATIONAL ARPT CTC TWR AT LEAST 15 MI OUT.
ANACOSTIA NAS-RADIO: Navy VHF/DF inop - repairs. (4-30)
ANACOSTIA NAS: All pilots clearing to Anacostia NAS under IFR should be thoroughly familiar with all Washington area rdo and communs facs, the reporting points, all holding pats, and let-down procedures, inclg "TIMED APCHS". (11-1)
BOLLING AFB: From 1200 May 16 until 2000 May 20, and 1200 to 2300 May 19, fld will be clsd to all acft with the exception of Special Air Mission Flgts. Andrews AFB will be open during this period for AF acft. Extreme ctn advised while flying in Washington area May 19 - aerial demonstrations in and around this area. These data rcvd too late for inclusion of + in Directory of Arpts.
WASHINGTON-SPECIAL NOTICE: CAA regards Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac Riv. Acft remain clear of U.S. Naval Medical Center, Bethesda, Md., lat 39-00-30, long. 77-05-30.
WASHINGTON-RADIO-SPECIAL NOTICE: The following facs are to be used as an aid to any acft, military or civilian, that is known or believed to be in distress:

1. DF and Radar Net
   - A. ARTC
   - B. National MEW (radar) Washington
   - C. Anacostia NAS (tower DF)
   - D. Quantico MCAS (tower DF)
   - E. Andrews AFB (DF room)
   - F. Andrews AFB (CPN-18 radar)
   - G. Patuxent NAS (tower DF)
   - H. Patuxent NAS (Instrument control room)
   - I. Patuxent NAS (radar)

Acft desiring assistance should contact one of above agencies on 121.5 mc (2-23) Apch Ctl transmits and rcvs primary freq: 118.3 mc, secondary 134.64, 137.88, 118.1 mc. (OVER)

(5-8-51)

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Aberdeen	Salina	WAC 217	DF 26
Dubuque	Sioux City	WAC 305	
Lincoln	Wichita	FC 213	
Miles City	WAC 216	FC 232	

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

NEW EDITIONS

La Grande	4-12-51	AL 404		Springfield	4-11-51

DROPPED CHARTS

AL 261
AL 456
AL 320 ILS

When ordering charts from the U. S. Coast and Geodetic Survey, correct remittances should accompany all orders. Sectional Charts, price 25 cents each, should be ordered by name; World Aeronautical Charts, 25 cents each, by number with prefix (WAC); Approach and Landing charts, 5 cents each, by number with prefix (AL); Instrument Landing System Charts 5 cents each, by number with prefix (ILS); Automatic Direction Finding approach charts, 5 cents each, by number with prefix (ADF); Flight charts, 25 cents each, by number with the prefix (FC); Direction Finding charts, 40 cents each, by number and with the suffix as in 22 DF; Local charts, 25 cents each, by name as Miami Local; and Obstruction Plans, 40 cents each, by number with prefix (OP). Consult the dates of the Latest Prints of Instrument, Approach and Landing charts and Obstruction Plans for further information concerning these series of charts. (5-8-51)

Washington 25, D.C. - Price 25 cents per copy, $6.00 per year.

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.
NOTE: See OMNIRANGE USE, page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continuously by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
✓ = New facilities or name changes, see page 20
\+ = Additional data will be found in Notices to Airmen Section

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . Non-directional radio beacon (homing) power less than 50 watts
ML. . Range (loop radiators), power less than 50 watts
MM. . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z. . . . VHF station location marker at a range station.

RADIOTELEGRAPH CODE

A - ABLE	•—	F - FOX	••—•	K - KING	—•—	P - PETER	•——•	U - UNCLE	••—	Z - ZEBRA	——••
B - BAKER	—•••	G GEORGE	——•	L - LOVE	•—••	Q - QUEEN	——•—	V - VICTOR	•••—		
C - CHARLIE	—•—•	H - HOW	••••	M - MIKE	——	R - ROGER	•—•	W - WILLIAM	•——

FREQUENCY LEGEND

V = 135.9,135.0 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc: 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(5-22-51)

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.

SURVEILLANCE or PPI APPROACHES - **Only the ASR scope is used and aircraft may be** directed to any selected runway over approximately **the same flight path the pilot would take if flying VFR.** This scope furnishes **range and azimuth information only. Since no altitude information is available** to the controller, **pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR the weather minimums for this type of approach must be equal to, or better than the regular (R) minimums as listed in Flight Information Manual for the airport.**

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, **or in an emergency any CAA facility for information on nearest Radar Control.**

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES **TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES** LISTED, **THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.**

AIR FORCE GCA UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL AIR FORCE UNITS TRANSMIT ON AND GUARD THE FOLLOWING CHANNELS (FREQUENCIES): B=126.18; C=137.88; D=121.5; G=136.80; H=134.1; 142.02 mc; 3475, 4890 and 6640 kc.

STATION	Alt MSL	Ceiling	Visibility	HOURS OF OPERATION REMARKS, ETC.
Andrews AFB, Md.	529	250	1(D)1½(N)	Cont. 142.38
Barksdale AFB, La.	417	250	1(D)1½(N)	Cont IFR: 10-23 daily; 30 min notice other hrs.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR: VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree **turns for** identification. In either **case, instructions** will be followed **at the** pilot's discretion.

After **being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as** possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.
Alt MSL=Min. alt. over airport.
(D) = Day. (N) = Night. ➔ = New or revised data. ✓ = New facilities or name changes.

DIRECTORY OF AIRPORTS

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U.S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U.S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

* City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or *.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LEGEND

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

h - runway is paved (concrete, asphalt or similar type of paving)

aw - allway field

(26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting

- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

* An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U.S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AAF - Army Air Field
AFB - Air Force Base
CGAS - Coast Guard Air Station
MCAS - Marine Corps Air Station

NOTICES TO AIRMEN

SPECIAL NOTICES

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY:

Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

✓CHANGES FOR PILOT'S HANDBOOK (WEST) U. S.: (1) AL-12, dtd Dec. 4, 1950. Albuquerque, N. M., Kirtland AFB. Initial apch S crs 10,000' from Hot Springs rng; 6300' after passing Peralta FM (final).

(2) AL-322, dtd Oct. 17, 1950. Phoenix, Ariz., Sky Harbor Arpt. Initial apch: S crs 5000' from intsxn E crs Gila Bend rng.

(3) AL-481, dtd Nov. 28, 1949. Alice, Texas. Missed apch: Turn left, climb to 1700' on N crs. Alternate missed apch procedure (when directed by ATC): climb to 1500' on E crs of Alice rng.

(4) AL-344, dtd Aug. 3, 1949. Red Bluff, Calif. (Bidwell). Ceiling and visibility: 500-1 day, 500-2 night. Altitude over Red Bluff rng on final apch: 1000' msl. Minimum altitude over arpt: 854' msl.

✓CHANGES FOR PILOT'S HANDBOOK (EAST) U. S.: (1) AL-621, dtd Aug. 22, 1950. Bridgeport, Conn. Change SE crs to 315° mag, inbound.

(2) AL-261, dtd Oct. 11, 1950. Millinocket, Maine. Change E crs Millinocket rng to 280° mag, inbound.

(3) AL-254, dtd Mar. 9, 1949. Meridian, Miss. (Key). Change NE crs to E crs 263° mag, inbound.

(4) AL-598, dtd Feb. 2, 1951. Willow Grove NAS, Willow Grove, Penn. Change NE crs Willow Grove rdo rng to 236° mag, inbound.

(5) AL-58, dtd Dec. 4, 1950. Boston, Mass., Logan Arpt. Procedure turn: 1500' within 25 mi.

(6) AL-76, dtd April 3, 1951. Charleston, S. C. Alternate missed apch procedure (when directed by ATC); turn right, climb to 1400' on SW crs Charleston rng.

(7) AL-94, dtd Feb. 8, 1951, Columbus, Ohio, Port Columbus Arpt. Procedure Nos. 1 and 2. Alternate missed apch procedure (when directed by ATC): climb to 2300' on NE course within 25 mi.

(8) AL-314, dtd Nov. 17, 1950. Patuxent River NAS. Initial apch SW 1500' from Tappahannock rng; 1000' after passing intersection S course Andrews rng (final).

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous condition, reporters should utilize the CAA Airway Communications Stations. The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian terriroty.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no over-flights of foreign territory should be made without authorization from the foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtain countries.

✓DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS: The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed:

Radio Call	Frequency	Commissioned
Atlanta Center	120.3 mc	July 1, 1950
Boston Center	120.3 mc	Jan. 22, 1951
Chicago Center	120.3 mc	May 10, 1949
Cincinnati Center	120.3 mc	Mar. 28, 1951
Cleveland Center	120.3 mc	Nov. 3, 1950
Detroit Center	118.9 mc	Dec. 21, 1950
Ft. Worth Center	120.3 mc	April 29, 1951
Kansas City Center	120.3 mc	Feb. 8, 1951
New York Center	120.3 mc	Oct. 11, 1950
	120.7 mc	Jan. 25, 1950
Oakland Center	120.3 mc	Oct. 30, 1950
Pittsburgh Center	118.9 mc	Nov. 2, 1950
St. Louis Center	118.9 mc	Mar. 15, 1951
Salt Lake Center	120.3 mc	Jan. 24, 1951
San Antonio Center	120.3 mc	April 17, 1951
Seattle Center	120.3 mc	March 8, 1951
Washington Center	120.3 mc	Sept. 1, 1949

VHF OMNITEST SIGNAL FACILITIES: Experimental VHF omnitest signal facilities have been installed at the New York (LaGuardia 112.0 mc). Chicago (Midway 112.0 mc), and Kansas City (Municipal 113.0 mc) airports. These facilities cannot be used for navigational purposes but permit checking of aircraft navigational VOR receivers during a ramp test or while in flight near the airport. Voice communication is not available on the test signal frequency. The facility radiates a 0° course in all directions with a power output of about 10 watts. The identification consists of continuous dots without voice Each facility is continuously monitored and will shut down automatically if the 0° course varies by more than one degree from normal or in case the identification fails. Flight checks indicate that the omnitest signal is usable to a distance of about ten miles at minimum instrument altitude although regions of weak and unreliable signal may be encountered at shorter distances. The omnitest signal may be regarded as dependable when there is no flag alarm showing or where no flag alarm is incorporated in the aircraft unit and the identification is received free from interference and noise. Comment from airmen will be appreciated. Please forward same to: Civil Aeronautics Administration, Washington 25, D. C., Attention: W-380.

RECEIVER OMNITEST PROCEDURE - Receivers with omni-Bearing Selectors (OBS)

Tune in omnitest frequency. The "To-From" indicator should read "To" or "From" and the alarm flag, if one is used, should disappear.

Set OBS in vicinity of 0° to center "Deviation" indicator. The "To-From" indicator should read "From" and the difference between 0° and the actual OBS reading indicates the amount of calibration error in the airborne equipment. (5-22-51)

Set OBS in vicinity of 180° to again center "Deviation" indicator. The "To-From" indicator should read "To" and the difference between 180° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

With the "Deviation" indicator centered in the 180° position rotate OBS clockwise until "Deviation" indicator reads full scale or five dots to left. Note OBS reading. Next rotate OBS counterclockwise until "Deviation" indicator reads full scale or five dots to right. Note OBS reading. The difference between the two OBS readings is a measure of receiver course sensitivity.

If instrumentation includes a radio magnetic indicator (RMI), the pointer on this instrument connected to the receiver being checked should be observed. This pointer should indicate 180° ± 1 degree regardless of the setting of the OBS.

AUTOMATIC INDICATING RECEIVERS: Automatic indicating receivers do not have an Omni-Bearing Selector or a "To-From" indicator and have no ambiguity. The only course that can be checked is the one indicated when the equipment is receiving the 0° (magnetic north) radial from the station, which is automatically indicated when the receiver is turned on and tuned to the correct signal frequency. Either 0° or 180° will be indicated depending on the sensing designed into the particular receiving equipment (as described in the instruction book for that equipment).

REPORTING POINT REDESIGNATION: Effective immediately the HARTLEY INTSXN is redesignated as the intsxn of the SW crs Millville, N. J. and the S crs of New Castle, Del.

INSTRUMENT APPROACH PROCEDURES: The standard instrument approach procedures for the following airports have been CANCELLED: Low Frequency Radio Range: Williams, Calif., CAA Int. Field, Effective April 20, 1951. Instrument Landing System: Phoenix, Ariz., Sky Harbor Arpt., effective April 9, 1951.

ON-REQUEST REPORTING POINT: Effective immediately the SHERWOOD FOREST on-request reporting point (intsxn S crs Baltimore, Md. and a 75° true bearing from Riverdale, Md. rbn) is deleted.

AIR ROUTE TRAFFIC CONTROL AND FLIGHT ADVISORY AREA BOUNDARY AMENDMENTS: Effective immediately air route traffic control and flight advisory area boundaries are amended as follows.

(1) The CLEVELAND-CINCINNATI ARTC Boundary on Blue 81 is established 20 mi S of the intsxn of the center lines of Red 17 and Blue 81.

(2) The CLEVELAND-DETROIT ARTC Boundary on Blue 81 is the U. S. Canadian Border.

(3) The CINCINNATI-CLEVELAND Flight Advisory Area Boundary is amended to read: ....from the control area boundary on Green 4 east of Adamsville to the control area boundary 20 mi S of the intsxn of the center lines of Red 17 and Blue 81, thence to the control area boundary on Blue 15, 25 mi SW of the intsxn of the center lines of Red 17 and Blue 15.....

(4) The CLEVELAND-PITTSBURGH flight advisory area is amended to read....from the control area boundary W of Bergholz, Ohio to the control area boundary on Blue 81, 20 mi. S of the intsxn of the center lines of Red 17 and Blue 81...

(5) Effective May 15, 1951, the ATLANTA ARTC Area Boundary on Blue 39 was relocated from 25 mi. NE of Tri-City, Tenn. to 10 mi. SW of Paynesville, W. Va. rbn.

CHANGES IN WEATHER REPORTING FORM

Weather Broadcasts by CAA Communications Stations - Effective June 1, 1951, weather broadcasts from CAA Communications Stations will reflect certain changes in the form of aviation weather reports which are being made effective by the U. S. Weather Bureau as of that date. The new weather report form will list multiple cloud layers in ascending order of height, and changes noted in broadcast phraseology will be principally for the purpose of describing the cloud and ceiling conditions as reported. In this connection, it is recommended that all interested persons obtain the U. S. Weather Bureau pamphlet, "What's the Ceiling?", which explains in detail the improvement in form of aviation weather reports.

The principal changes covered in this pamphlet are as follows:

1. All cloud layers will be reported in ascending order of height.
2. Thin cloud layers will not be reported as a ceiling.
3. All ceiling layers will be identified by a letter designator.
4. "X", "-X" will be used to report obscurations on the ground only.
5. Peak gusts of wind will be reported immediately following the current wind speed rather than in remarks.
6. Intensity classification for wind shifts and squalls have been discontinued.
7. A new precipitation intensity "very light" has been established. The new teletype abbreviation for this intensity is "minus minus".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

[redacted]: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (3-19)
ANNISTON-RADIO: Omnirng gnd-checked only. (4-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (5-17)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. Taxi with ctn thru intsxn Rnwy 6-24 and black top rnwy - two high intensity rnwy lgts are lctd in center of black top rnwy. E/W and NE/SW Sod Strips clsd (const). (4-20) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
EVERGREEN-RADIO: About June 11, omnirng will be shut down until approx July 26 - modernization. (5-18) These data rcvd too late for + on ANRA page.
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn. (5-10)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20) Rnwy 5-23 clsd (const). (5-7)
MONTGOMERY-RADIO: Apr. 20, omnirng shut down until approx May 25 - modernization.
MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 18-36 inop. (3-19)
[redacted]: **AMADO-KINSLEY RANCH: Correct lat. 31-43-45, long. 111-04-00. (2-23)
DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (4-2)
FLORENCE: Mortar firing will be conducted in rectangular area approx 2 mi NNE on May 20 and 27, with trajectory up to 7000' above terrain. Area is defined as follows: N bndry: lat 33-09-30; S bndry: lat 33-03-30; E bndry: long. 111-19-00; W bndry: long. 111-22-30.
LUKE AFB (PHOENIX): Ctn - exten const all rnwys. (2-19) Rnwy 3-21 clsd (const). (5-2)
**MARANA ARPT: Correct lat 32-30-30, long. 111-19-30. (2-6)
PHOENIX-SKY HARBOR ARPT-TOWER: From Mar. 26, until approx June 26, rdo equip being moved to new twr. During this period short interruptions. (3-14)
[redacted]: BENTON ARPT: W half N/S Strip clsd (const). (2-7)
BENTONVILLE ARPT: 51' bcn twr being erected E side adj to N end of hangar. (4-13)
BRINKLEY-FEDERER MEMORIAL ARPT, SITE 37, DAL-LOU: Clsd ngts. Rows of dirt on SW end NE/SW Strip, use emerg only. (5-17)

(5-22-51)

ARKANSAS: CLARKSVILLE ARPT: E/W Strip clsd. (2-12)
FAYETTEVILLE-RADIO: May 1 omnirng shut down until approx July 20 - modernization.
FAYETTEVILLE ARPT: 75' twr being erected NW corner between hangar and hwy. (5-8)
FT. SMITH-RADIO: About June 18 omnirng will be shut down until approx Sept 16 - relctn. (5-15)
FT. SMITH ARPT: Equip on W end E/W Rnwy. (4-9)
**GURDON, BCN SITE 23, DAL-LOU: May 14, site decommd.
LITTLE ROCK-ADAMS FLD-TOWER: Transmission and reception poor on all VHF freqs S to W account obsts near temp twr until approx Aug 1, 1951. Apch ctl on 353 kc shut down. (5-14) FLD: Ctn lndg N or NE, vision of ctl twr partially obstd. (5-14) Lmtd NG svcg. (10-24)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
CALIFORNIA: ARCATA ARPT: Ctn-const days. Use rnwys only. (2-7)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft xcpt on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea. conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Acft parked on mat area; taxying on rnwys. (3-13)
CRESCENT CITY-RADIO: Omnirng radials 90° thru180° to 270° usable dist 25 mi. (10-10)
CRESCENT CITY-DEL NORTE CO. ARPT: Drifting sand across W end taxi strip leading to Rnwy 11. Use rnwy for taxying only. (5-18)
CULVER CITY ARPT: About May 31, arpt will be perm clsd. (5-16)
CULVER CITY-HUGHES ARPT: Entire fld clsd xcpt NW half strip 4-22. Usable portion mrkd day, ngt. Clsd trans acft xcpt on prior permission. (3-9)
EDWARDS AFB (MUROC): Lctd within a danger area. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld.(4-23)
FORT ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (3-11)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
★HAMILTON AFB (SAN RAFAEL)-RADIO: USAF homing fac operg on 219 kc, ident HAP. Lctd lat 38-02-56, long. 122-29-44. Operg with voice and ctld by twr. Bear, dist to Rnwy 30: 300°, 1300'. Oper cont. Class: MH. (5-14)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (4-5)
LOS ANGELES-AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: About June 15, transmitter and rcvr 120.3 mc will be commd. (5-7)
★LOS ANGELES INTERNATIONAL ARPT-TOWER: CAA ILS temp lclzr serving Rnwy 25L decommd and perm lclzr on 109.9 mc, channel Y, ident LAX, with voice, commd. Lctd 11,000' W apch end Rnwy 25L. Apch bear: 248°. (5-21) Effect. Apr 9 until approx June 8, voice communs may be interrupted for short periods during new twr const. About June 20 until approx July 2, ASR and PAR will be inop. (5-17) FLD: Rnwy 4-22 clsd (const). Rnwy 7L-25R usable portion 4500' from apch end 25R. Const across W end Rnwy 25R. 100' crane, equip on and adj const area. Use paved areas only. Rnwy 25R clsd take-offs. Rnwy 7L clsd lndgs 0700-1700 daily xcpt Sat and Sun. Two green transverse bar lgts mrk threshold Rnwy 25L. Because of new twr const approx 1/2 mi of tfc pat S of arpt not visible to twr controllers (5-17)
MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. (1-15)
MATHER AFB-TOWER: USAF GCA inop. (4-25)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21)
**MONTEREY-PENINSULA ARPT: Standard mil rot. lgt converted to standard civil rot. lgt. (5-9)
NORTON AFB (SAN BERNARDINO): Ctn-equip. on fld days. (3-29)
OAKLAND-RADIO: Omnirng maximum usable dist, 40 mi N thru E at minimum instr alt. (2-28)
OAKLAND ARPT: Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. (3-8)
**RIALTO-MIRO-FONTANA ARPT: Correct lat 34-07-45, long. 117-23-30. (1-12)
SAN DIEGO-RADIO: Omnirng operg on test-basis, awaiting flgt-check. (5-4)
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. No opers Sat, Sun, or holidays. (4-30)
**SAN DIEGO-LINDBERGH ARPT:247' ant. twr for TV Stn KFMB erected 8 mi NNW (333°T) at lat 32-50-15, long. 117-14-58. (4-25)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (2-21)
SAN DIEGO-NAS SEAPLANE BASE: Sealane mrkrs under const. Perm pile-mounted day mrkrs and seadrome lgts are being installed in S San Diego Bay to delinate the sealanes. There are two sealnes each 1000' wide, extending NW/SE; 14,875'; E/W, 9,872'. Bndrys and ends of lanes mrkd, day, ngt. Ctn during lndg and take-off. It is also noted that due to mrkrs being pile-mounted the height above water will vary with the state of the tide.
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)
SAN FRANCISCO ARPT-TOWER: CAA ILS Lclzr operg with slight scalloping. (1-26) FLD: Apch lgts inop. Rnwys clsd days intermittently. Turf area clsd. Equip. on fld. (1-26) Const on apron adj Intnl Terminal, mrkd. Taxi with ctn. (5-17)
**SAN FRANCISCO SEAPLANE BASE: B oct. no longer avail. (5-3)
**SANTA BARBARA-RADIO: Visual-aural rng realigned as follows: 49BA 139 NB 229 YN 319 AY. Aligned by ground-check only, awaiting flgt-check. These data rcvd too late for inclusion on ANRA page. (5-19) About May 28 omnirng will be comm. Freq: 114.9 mc Ident SBA. Lctd lat 34-30-36, long. 119-46-13. Class will be: VORW. (5-21)
SANTA BARBARA ARPT: Lgtg const Rnwy 7-25. Open ditch 7' from edge of rnwy. 275' E end Rnwy 25 clsd. Const near intsxn all rnwys, mrkd. Taxiway 3 between intsxn with Taxiway 4 and apch end Rnwy 25 perm clsd to acft with 2000 lbs or more gross wt. Threshold lgts Rnwy 7 inop. Extension apch end Rnwy 7 usable days only. (5-18)
SANTA MONICA ARPT: 16" elevated lgts being installed both sides Rnwy 3-21. Rnwy 4-22 clsd. Rnwy 3-21 hazardous - const. (3-29)
THERMAL-RADIO: About May 23, omnirng will be comm. Freq: 114.3 mc. Ident: TRM. Lat 33-37-35, long. 116-09-45. (5-10)
COLORADO: COLORADO-SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U.S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (9-25)
DENVER-RADIO: About May 25, transmitter and rcvr 121.5 mc will be commd. (4-20)
DENVER-AIR ROUTE TRAFFIC CONTROL CENTER: Soon transmitter and rcvr 120.3 mc will be commd. (5-18)
DENVER NAS (BUCKLEY FLD)-RADIO: Navy X-band Radar Bcn, code 2-1-1, inop. (4-26)
PUEBLO: Ordnance depot approx 17 mi E at lat 28-16-53, long. 104-18-09, conducting all types of demolition work 0800-1630 daily, Mon thru Fri, during month of May. (4-9)
THURMAN-RADIO: Omnirng will be shut down for a 15 min period between 1000 and 1100 each day until approx May 21. (5-2)

ROCK SPRINGS ARPT: 0800-1700 const on taxiways adjoining rnwys, mrkd. (4-8)

GOOD OPERATING PRACTICES

A comprehensive analysis of air traffic incidents which occurred in 1949 reveals that traffic conflictions occurred quite frequently when no one had violated any specific air traffic rule. Such conflictions might be reduced by writing more rules, but there is serious doubt as to the practicability of writing more rules when many of our air traffic problems are due to difficulty in applying existing rules. Furthermore, it is extremely unlikely that air traffic rules can ever be written so as to eliminate the need for good judgment in the planning and conduct of every flight.

Conformance with the following Good Operating Practices will greatly reduce traffic conflictions:

1. Use reasonable restraint in exercising the prerogatives of VFR flight, especially in terminal areas.

   The weather minimums and distances from clouds are minimums. Giving yourself a greater margin in specific instances is just good judgment.

   a. Conducting a VFR operation in a control zone when the official visibility is 3 or 4 miles is not prohibited, but good judgment would dictate that you keep out of the approach area.

   b. It has always been recognized that precipitation reduces forward visibility. Consequently, although again it may be perfectly legal to cancel your IFR flight plan at any time you can proceed VFR, it is good practice, when precipitation is occurring, to continue IFR operation into a terminal area until you are reasonably close to your destination.

   c. In conducting simulated instrument flights, be sure that the weather is good enough to compensate for the restricted visibility of the safety pilot or your greater concentration on your flight instruments. Give yourself a little greater margin when your flight path lies in or near a busy airway or close to an airport.

2. Be alert at all times, especially when the weather is good.

   Most pilots pay attention to business when they are operating in full IFR weather conditions, but strangely, air collisions almost invariably have occurred under ideal weather conditions. Unlimited visibility appears to encourage a sence of security which is not at all justified.

3. If you think another aircraft is getting too close to you, give way instead of waiting for the other pilot to respect the right-of-way to which you may be entitled.

   It is a lot safer to pursue the right-of-way angle after you have completed your flight.

4. Plan and conduct an IFR operation unless the weather is well above VFR minimums.

   When a flight cannot be completed safely under Visual Flight Rules is strictly a matter of judgment. Good judgment would dictate that you use this prerogative very conservatively.

5. Use the Federal Airways.

   The establishment of the Federal Airways system costs the Government millions of dollars annually. The operation and maintenance of the system costs additional millions every year. Sure, you can stay off the airways most of the time during certain flights by electing to fly "direct," but why ignore the additional safety available in controlled airways?

6. Follow IFR procedures even when operating VFR.

   You don't have to follow IFR procedures if you are conducting a VFR operations, but you cannot maintain instrument proficiency without practicing at every opportunity. Use all the navigational aids available and make accurate position reports.

7. When conducting an IFR operation, make a written record of your ATC clearance.

   The specified conditions which are a part of your air traffic clearance may be somewhat different from those included in your flight plan. Additionally, air traffic control may find it necessary to add conditions, such as a particular departure route. The very fact that air traffic control specifies different or additional conditions means that other aircraft are involved in the traffic situation.

Conformance with the above Good Operating Practices is not as simple as it sounds. It requires constant attention to innumerable details and a deep-seated realization that additional hazards incident to flight operations exist whenever vigilance is relaxed.

(OVER)

(5-22-51)

New editions of the charts listed below will be published in about one month, making former prints obsolete for use in aviation. Orders for these particular charts should be kept to a minimum for immediate requirements. As soon as the charts are available for distribution a second notice will appear in this publication.

Duluth	Minot	St. Louis Local
Fargo	WAC 361	DF 25
Lake Superior	FC 233	
Lake of the Woods	Kansas City Local	

A new edition (or new chart) of the charts listed below which make former prints obsolete is now available for use. Former prints should be destroyed or stamped "OBSOLETE FOR USE IN AVIATION".

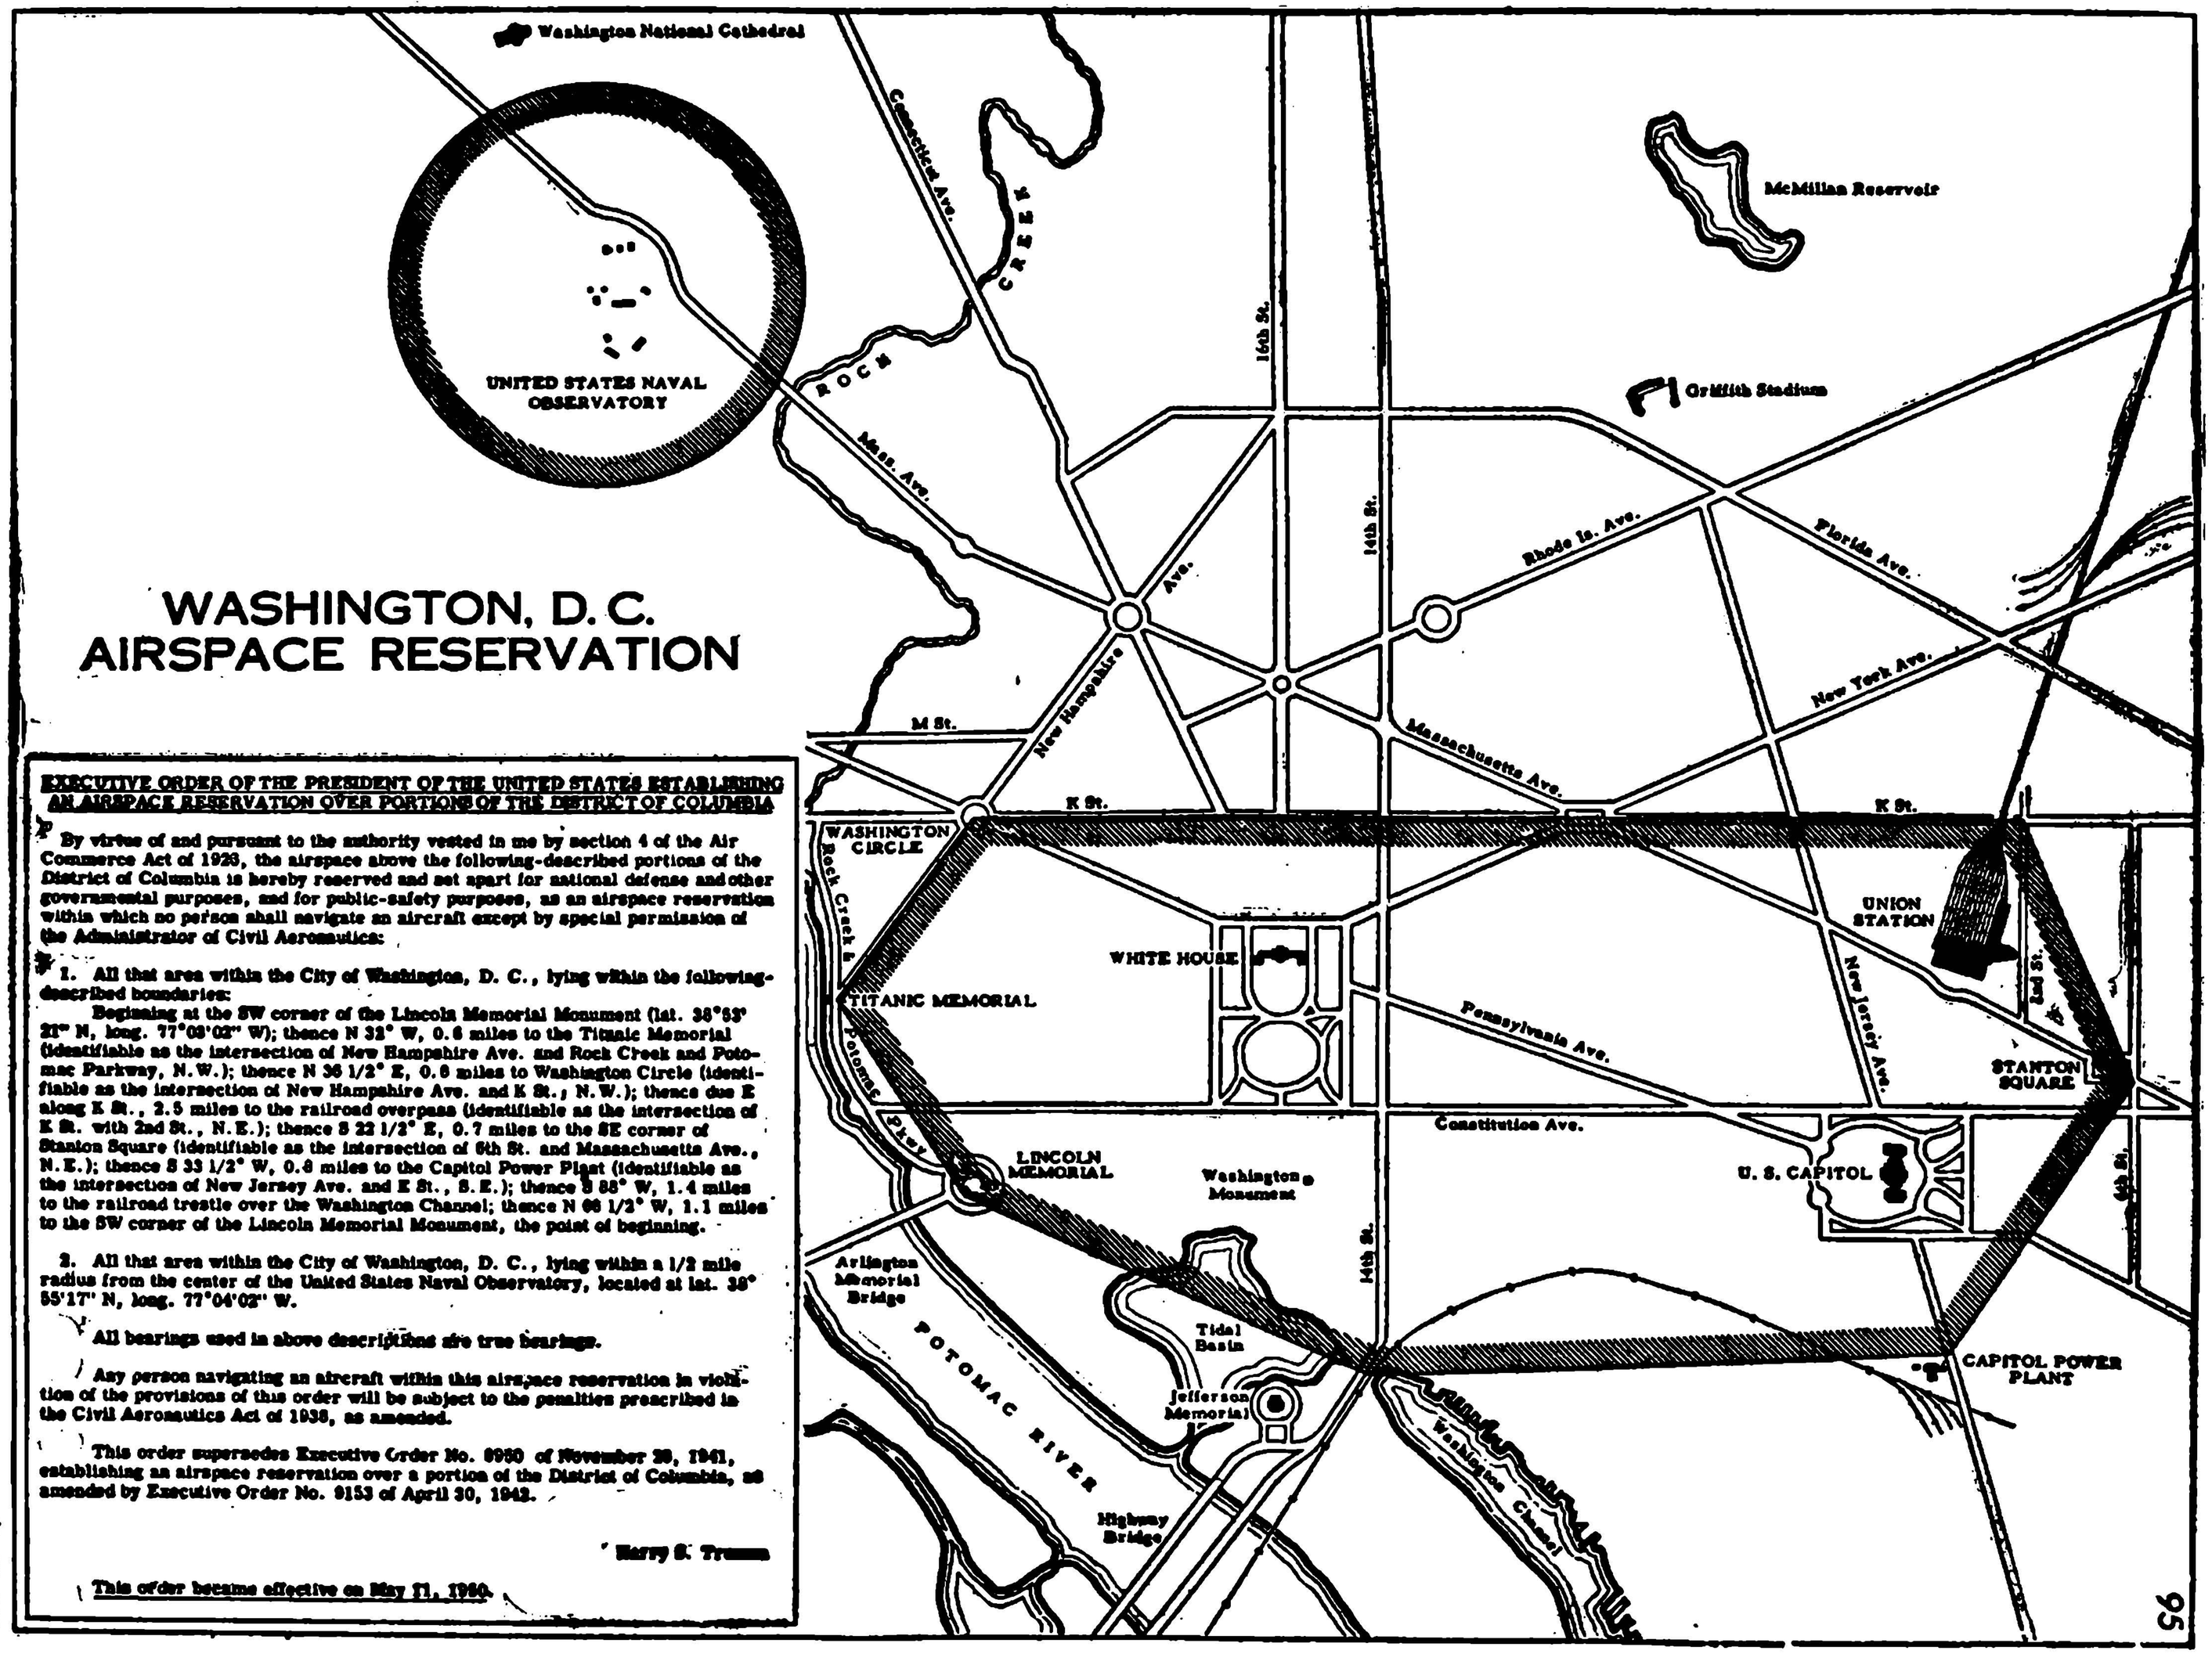
WASHINGTON, D. C.
AIRSPACE RESERVATION



EXECUTIVE ORDER OF THE PRESIDENT OF THE UNITED STATES ESTABLISHING AN AIRSPACE RESERVATION OVER PORTIONS OF THE DISTRICT OF COLUMBIA

By virtue of and pursuant to the authority vested in me by section 4 of the Air Commerce Act of 1926, the airspace above the following-described portions of the District of Columbia is hereby reserved and set apart for national defense and other governmental purposes, and for public-safety purposes, as an airspace reservation within which no person shall navigate an aircraft except by special permission of the Administrator of Civil Aeronautics:

1. All that area within the City of Washington, D. C., lying within the following-described boundaries:

Beginning at the SW corner of the Lincoln Memorial Monument (lat. 38°53' 21" N, long. 77°03'02" W); thence N 32° W, 0.6 miles to the Titanic Memorial (identifiable as the intersection of New Hampshire Ave. and Rock Creek and Potomac Parkway, N.W.); thence N 36 1/2° E, 0.6 miles to Washington Circle (identifiable as the intersection of New Hampshire Ave. and K St., N.W.); thence due E along K St., 2.5 miles to the railroad overpass (identifiable as the intersection of K St. with 2nd St., N.E.); thence S 22 1/2° E, 0.7 miles to the SE corner of Stanton Square (identifiable as the intersection of 6th St. and Massachusetts Ave., N.E.); thence S 33 1/2° W, 0.8 miles to the Capitol Power Plant (identifiable as the intersection of New Jersey Ave. and E St., S.E.); thence S 88° W, 1.4 miles to the railroad trestle over the Washington Channel; thence N 66 1/2° W, 1.1 miles to the SW corner of the Lincoln Memorial Monument, the point of beginning.

2. All that area within the City of Washington, D. C., lying within a 1/2 mile radius from the center of the United States Naval Observatory, located at lat. 38° 55'17" N, long. 77°04'02" W.

All bearings used in above descriptions are true bearings.

Any person navigating an aircraft within this airspace reservation in violation of the provisions of this order will be subject to the penalties prescribed in the Civil Aeronautics Act of 1938, as amended.

This order supersedes Executive Order No. 8930 of November 28, 1941, establishing an airspace reservation over a portion of the District of Columbia, as amended by Executive Order No. 9153 of April 30, 1942.

Harry S. Truman

This order became effective on May 11, 1960.

(5-22-51)

IMPENDING CHANGES IN AERONAUTICAL DISTANCE AND SPEED UNITS

All CAA air-ground communications within the continental United States and Alaska will change over to the use of nautical miles for horizontal distance and visibility and knots for horizontal speed on July 1, 1952. These changes are necessary in order to conform to international practices.

Basically, a nautical mile is the length of a minute of latitude at sea level, or the length of a minute of longitude at sea level at the equator. This distance is 6,080.20 feet, as compared to 5,280 feet for the common or statute mile. Since the ratio 6,080/5,280 is equal to 1.15, and the ratio 5,280/6,080 is equal to .87, it is apparent that the number of statute miles is 115% of the number of nautical miles, or the number of nautical miles is 87% of the number of statute miles. Furthermore, if the fraction 6,080/5,280 is reduced to lowest terms, we obtain 38/33, indicating that 38 statute miles are equal to 33 nautical miles.

Furthermore, practically all air navigational computers provide quick and easy conversions of nautical miles to statute miles, or vice versa, so no difficulties should be experienced by anyone who will attempt to inform himself as to the relationship of the units and with at least one of the various methods of conversion. Attention is specifically called to the fact that the knot is a unit of speed and not a unit of distance, being equal to nautical miles per hour.

Conversion Tables for Statute and Nautical Miles
(To the nearest hundredth)

1 nautical mile = 6,080.20 ft. 1 statute mile = 5,280.00 ft.

Statute	- Nautical	Nautical	- Statute
1	0.87	1	1.15
2	1.74	2	2.30
3	2.61	3	3.45
4	3.47	4	4.61
5	4.34	5	5.76
6	5.21	6	6.91
7	6.08	7	8.06
8	6.95	8	9.21
9	7.82	9	10.36
10	8.68	10	11.52
20	17.37	20	23.03
30	26.05	30	34.55
40	34.74	40	46.06
50	43.42	50	57.58
60	52.10	60	69.09
70	60.79	70	80.61
80	69.47	80	92.12
90	78.16	90	103.64
100	86.84	100	115.16

AIR NAVIGATION RADIO AIDS

INSAC = Interstate Airway Communications Station (CAA).

VHF OMNI-RANGES: "Non-commissioned" VHF omni-ranges may lack certain items, such as monitoring or control equipment or may not have been flight-checked and are subject to shut-down at any time without notice. The courses may or may not be within the prescribed tolerances and the station is to be used accordingly.

NOTE: See OMNIRANGE USE. page 79.

VAR AND VOR MONITORING CLASSIFICATION FOR AIR TRAFFIC CONTROL PURPOSES: Category I (VAR) = Following conditions must be met: (A) The visual course alignment and signal level are monitored continuously. (B) The aural "A" or "N" sector signal is monitored continuously by the communicator at the associated INSAC. (C) The station identification is monitored continusouly by the communicator at the associated INSAC. (D) The aural course alignment is monitored at least once each hour by the communicator at the associated INSAC. Category I (VOR) = Course alignment and signal level are monitored continuously. NOTE: Category I indicated by parenthetical (1). Category II (VAR only) = If all except (D) of the conditions of Category are met. NOTE: Category II indicated by parenthetical (2). Category III = Facility monitored solely through use of automatic visual course and signal level monitor with automatic transfer unit. This category may permit VOR to be inoperative for a limited period before a notice to airmen is issued. Normally, VHF ranges which are not controlled by an INSAC, and located too distant from INSAC to be monitored with a VHF receiver will fall into Category III. NOTE: Category III indicated by parenthetical (3).

NOTE: Letters between range crs are quadrant identifiers, e.g., "90 YN 180" indicates the quadrant between the two crs is a yellow N quadrant. The letter immediately following a range crs indicates whether the course is aural or visual, i.e., "Y" or "B", for yellow or blue, indicates visual: "A" or "N", arual. In the case of low frequency ranges, the A or N cited between two courses is the identification to be heard in the quadrant between those two courses.

LEGEND

(A) = Air Force facility. (N) = Navy facility. (P) = Private facility
(g) = Tower equipped with 121.9 or 121.7 mc transmitter for control of ground traffic. (7-19) = Hours of operation, i.e., 0700-1900
(U) = Unmonitored, but usable for navigation (3) = Monitoring category
(B) = Blue Hemisphere; (Y) = Yellow hemisphere
→ = New or revised data
↙ = New facilities or name changes, see page 20
+ = Additional data will be found in Notices to Airmen Section

RADIO CLASS DESIGNATIONS

AC. . . Approach Control Tower, CAA (transmits on voice channel of associated L/MF range or ILS in addition to frequencies listed)
B. . . . Scheduled Broadcast Station (broadcasts weather at 15 & 45 minutes after the hour; Air Force Broadcasts, generally, 29 minutes)
C. . . . Control Tower, CAA
CA. . . Control Tower, Air Force
CI. . . Control Tower (City, County, Private, etc.)
CN. . . Control Tower, Navy
D. . . . Distantly controlled
FM. . . VHF fan marker (100 watts)
GCA. . Ground Controlled approach system
H. . . . Non-directional radio beacon (homing), power 50 watts to less than 2000 watts
HH. . . Non-directional radio beacon (homing), power 2000 watts or more
ILS. . . Instrument Landing System (voice on localizer channel)
J. . . . L/MF (200 - 415 kc) voice facility on other than range frequency
LFM. . VHF fan marker, low powered (5 watts)
LMM. . Compass locator station when combined with middle marker of ILS
LOM. . Compass locator when installed at outer marker site or within 5.5 miles of middle marker
MH. . . Non-directional radio beacon (homing) power less than 50 watts
ML. . . Range (loop radiators), power less than 50 watts
MM. . . VHF middle marker
MOR. . Low frequency omni-directional range
MRA. . Range (adcock, vertical radiators), power 50 or more, but less than 150 watts
MRL. . Range (loop radiators), power 50 or more, but less than 150 watts
OM. . . VHF outer marker
P. . . . Point-to-Point radio
RA. . . Range (adcock, vertical radiators), power 150 watts or more
RL. . . Range (loop radiators), power 150 watts or more
S. . . . Simultaneous (range signals and voice) type of transmitter
T. . . . Teletype
TX. . . Principal teletype
V. . . . Additional VHF voice feature on other then range frequency
VAR. . Visual-aural VHF range
VOR. . Omni VHF omni-directional range (omni-range)
W . . Without voice facilities on range frequency
Z. . . . VHF station location marker at a range station.

RADIOTELEGRAPH CODE

A - ABLE	•—	F - FOX	••—•	K - KING	—•—	P - PETER	•——•	U - UNCLE	••—	Z - ZEBRA	——••

FREQUENCY LEGEND

V = 135.9,135.0 and 111.1 mc transmitted.
# = Guards same VHF frequencies station transmits except 111.1 mc and 135.0 mc.
(1) = 3105,4495 kc guarded
(2) = 3105, 4495kc; 122.5 mc. This group of frequencies is group generally guarded by C.A.A. towers.
(3) = 3105,4495 kc; 122.1,126.7, 135.9 mc. This group of frequencies is group generally guarded by INSACS.
e.g., (3)-135.9, 122.1 = guards every frequency in group (3) except 135.9 and 122.1

NOTES

1. Range courses are magnetic in-bearings.
2. All C.A.A. MH facilities operate continuously unless cited as follows: (on req)
3. All C.A.A. ranges operate continuously. Those which are not manned continuously are cited in the class column with hours of operation in parentheses, e.g., (6-24)
4. When a VHF is controlled by an associated LF range, because of space limitation, DTV is not included in the VHF range class.

Pilots are requested to indicate when calling C.A.A. airway communications stations and control towers the frequency on which the reply is expected.

(6-5-51)

RADAR AVAILABLE : How and Where

GCA= GROUND CONTROLLED APPROACH - COMPRISED OF TWO UNITS - PAR and ASR.
PAR= PRECISION APPROACH RADAR. ASR= AIRPORT SURVEILLANCE RADAR.

GROUND CONTROLLED APPROACHES - The only airborne equipment required for ground controlled approaches is a functioning radio transmitter and receiver. There are two types of ground controlled approaches - Precision and Surveillance (PPI).

PRECISION APPROACHES-Aircraft are guided to final approach to the designated instrument runway. The final approach flight path on a precision scope (PAR) is greatly expanded for increased accuracy and furnishes the controller with range, azimuth and altitude information. This permits the controller to accurately guide aircraft to touchdown on the runway. However, the weather minimums listed below apply.

SURVEILLANCE or PPI APPROACHES - Only the ASR scope is used and aircraft may be directed to any selected runway over approximately the same flight path the pilot would take if flying VFR. This scope furnishes range and azimuth information only. Since no altitude information is available to the controller, pilots must control their descent based on the glide angle desired, and the distance from the runway as furnished by the controller. Because ASR does not permit the same degree of accuracy as PAR the weather minimums for this type of approach must be equal to, or better than the regular (R) minimums as listed in Flight Information Manual for the airport.

CAA RADAR UNITS - Operate continuously at the locations listed. Available to all pilots, civil and military. Contact associated CAA control tower on any frequency guarded for initial instructions, or in an emergency any CAA facility for information on nearest Radar Control.

AIR FORCE AND NAVY GCA UNITS - Available to civil pilots in emergency or by prior arrangement with C.O. of respective facility.

Contact under IFR: Pilots desiring GCA assistance during IFR conditions should call the nearest air traffic control facility (radio, airways, or tower, etc.) requesting GCA and further instructions.

Contact under VFR. VFR check-out of training flights should be arranged locally through Base Operations or the Control Tower.

Emergency: When receiver or transmitter difficulties exist, the tower may relay GCA approach instructions to the pilot, or the GCA operator may transmit, in blind, instructions for aircraft to make three hundred sixty (360) degree turns for identification. In either case, instructions will be followed at the pilot's discretion.

After being inoperative, GCA units require 20 to 30 minutes for warming up. Pilots should anticipate requirements for GCA in flight planning and request alerting of GCA units as far in advance as possible.

Civil minimums at military installations established by the CAA are 400' ceiling and 1 mile visibility except in emergency unless Air Force or Navy facility being used has higher minimums.

Navy units are prepared to transmit on HF from 2000 to 18,100 kc and receive any frequency from 1500 to 9050 kc to aid any plane in emergency.

Alt MSL=Min. alt. over airport.

(D) = Day. (N) = Night. ➔ = New or revised data. ✓ = New facilities or name changes.

CAA RADAR UNITS

EXCEPT WHERE NOTED IN REMARKS, ALL CAA UNITS GUARD THE VHF FREQUENCIES TRANSMITTED PLUS 3105, 4495 kc AND 122.5 mc. IN ADDITION TO THE FREQUENCIES LISTED, THEY TRANSMIT ON: 118.1, 121.5, 126.18 mc.

STATION	TRANSMITS	WEA. MINIMUMS Alt MSL	Ceiling	Visibility	HOURS OF OPERATION, REMARKS, ETC.

DIRECTORY OF AIRPORTS

LEGEND

CITY AND AIRPORT NAME

(AF) Airport name followed by city name in parenthesis (With AF in Type Column) - field owned or leased in whole by U. S. Air Force.

(AF) City and Airport Name (with C,I,M,MG or P in Type Column) - a civil airport with Air Force operations, reserve training, or other such acitvity thereon.

NOTE: Similar combinations of above two citations of A,N,CG, and NG indicate the same is applicable for Army, Navy, Coast Guard, and National Guard fields respectively.

(P) City and Airport Name - Civil Airport covered by an agreement between municipality and U. S. Government which permits use by transient military aircraft.

(PC) Same legal status as (P), but closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16.

★ City, Site No., and Airway abbreviation - CAA intermediate field. Municipal airports with lights maintained by the CAA are listed similarly except there is no prefixed star.

NOTES:

1. MILITARY FIELDS ARE OPEN TO CIVIL AIRCRAFT ONLY BY PRIOR PERMISSION OF THE C.O. THEREOF. ALL AIRPORTS with C,I,M, or MG in type column are open to civil fliers.

2. USAF aircraft are permitted to use only those fields prefixed with an AF,A,N,NG,CG,P,PC or ★.

3. When city and airport names are identical, the airport name is omitted to conserve space.

TYPE

AF	-Air Force	CG	-Coast Guard	MG	-Misc. Govt
A	-Army	I	-Intermediate	N	-Navy
C	-Commercial	M	-Municipal	NG	-Nat'l Guard
				P	-Private

LOCATION

The word "miles" has been eliminated because of space limitations. Mileage is that from the center of city to airport.

If orientation features are less than 1/2 mile from the field, distance is not specified

ELEVATION

Obviously, the effective length of a runway decreases with elevation above sea level. The C.A.A. formula for elevation correction is that a sea level runway length requirement must be increased 7% per 1000 feet of elevation above sea level. High temperatures also play an important role in reducing the effective length of runways.

NUMBER OF RUNWAYS

No differentiation is made between runways and strips as far as number of landing areas in field is concerned.

LONGEST RUNWAY

FACILITIES

In this column are included the length and surfacing of the longest runway, the lighting and servicing facilities, and weather reports available.

RUNWAYS

The length of the longest paved runway or non-paved strip is stated in hundreds of feet. If the length is not prefixed, the surface is sod, clay, gravel, etc.

- h - runway is paved (concrete, asphalt or similar type of paving)
- aw - allway field
- (26) - runway or strip length not verified by C.A.A.

LIGHTS

B: Rotating Light (Rotating beacon)
(Green and white, split-beam and other types)
Omission of B indicates rotating light is not available.

NOTE: Code lights are not codified, and are carried in Remarks Column.

L: Field Lighting
- L - by itself indicates temporary lighting, such as flares, smudge pots, lanterns.
- 1 - Portable lights (Electrical)
- 2 - Boundary
- 3 - Runway floods
- 4 - Runway or Strip
- 5 - Instrument approach (neon)
- 6 - High intensity runway
- 7 - High intensity instrument approach

✱ An asterisk preceding an element indicates that it operates on prior request only (by phone call, telegram or letter). Where the asterisk is not shown, the lights are in operation or available sunset to sunrise by request (circling the field or radio call).

Because the obstructions on virtually all lighted fields are obstruction lighted, obstruction lights have not been included in the codification.

SERVICING

S1: Storage
S2: Storage, minor aircraft repairs
S3: Storage, minor aircraft, and minor engine repairs
S4: Storage, major aircraft, and minor engine repairs
S5: Storage, major aircraft, and major engine repairs

NOTE: Any S combination without parenthesis indicates only full-time day attendant. Fields having lighting facilities may have 24 hours attendant available.
Any S combination in parenthesis-part time or irregular attendant.

WEATHER

W: Weather reports available from Weather Bureau or C.A.A. communications station on field.

FUEL OCTANE

Civil Fuel:

F1: 80 oct., at least
F2: 87 oct., and lower
F3: 91 oct., and lower
F4: 100 oct., and lower

NOTE: If only one octane available, this octane cited, and not coded.
Any F combination without parenthesis indicates full time day attendant, in parenthesis part-time or irregular attendant.

FUEL OCTANE (cont)

Air Force and Navy Fuel:

A+: 115/145 oct.
A : 100/130 oct.
B : 91/98 oct.
C : 73/80 oct.
J : JP - 1
J3: J-3

REMARKS

(a) "INACTIVE" indicates usable civil field, but not being operated, at last inspection. Caution advised.

(b) "CLOSED" indicates closed to all traffic except in emergency.

(c) "OFL BUS ONLY" indicates closed to all transient military aircraft except on official business or in emergency. U. S. Aircraft require written orders. "AF OFL BUS ONLY" or "NAVY OFL BUS ONLY" indicates applicability of restriction only to Service indicated.

(c) "INACT - NO FACS" indicates AF airfields used exclusively by the USAF or municipal fields used jointly by the USAF and civil interest at which both USAF and civil interest are inactive; these will be available to military aircraft at the discretion of the Commanding Officer of the organization to which aircraft are assigned.

(e) "CIVIL FACS ONLY" indicates municipal fields under joint control or ownership of the USAF and/or Navy and civil interests at which no USAF or Navy facilities are available. Such fields may be used by military aircraft; however, only commercial service is available.

(f) "LIMITED USE" indicates some special restriction on use of field which will be listed in Notices to Airmen section of Airman's Guide.

(g) "ABANDONED" indicates reverted to non-airport usage such as farming or grazing.

(h) "REPORTED ABANDONED" indicates an airport reported abandoned but not verified as such by C.A.A.

(i) "FEE" indicates landing charges for private or non-revenue producing aircraft. In addition, fees may be charged for planes that remain over a couple of hours and buy no services, or at major airline terminals for all aircraft.

(j) "+" indicates additional data in Notices to Airman Section.

(k) "Blkd" indicates approaches where glide angle to runway is 3:1 or less.

(l) "Rgt tfc N" indicates right turns should be made on landings and take-offs to N.

(m) "A,B" indicates Air Force or Navy fuel. See Fuel Octane column.

NOTES:

1. → New or revised data.
2. SCHEDULED AIRLINE STOP airport names are capitalized.
3. PRIVATE AIRPORTS: Usually unattended, offer no public service and solicit no public patronage. Such fields are listed primarily because of their possible utility as emergency landing areas. Use of these fields is at the risk of the user. No "S" or "F" combination is ever assigned these fields.
4. OBSTRUCTIONS: Because of space limitations only the more dangerous obstructions are indicated. Natural obstructions, like trees, for example, clearly discernible for contact operations, are frequently omitted. On the other hand, all pole lines within at least 15:1 glide angle are indicated.
5. NEW AIRPORTS: At the end of each state, under this heading will be found, out of alphabetical alignment, all the new airports tabulated after the type for that state had been originally set up.

AIRPORT NAME ABBREVIATIONS

AAF - Army Air Field
AFB - Air Force Base
CGAS - Coast Guard Air Station
MCAS - Marine Corps Air Station

NAVY SPECIAL NOTICES

NAVY DATA: In accordance with Hydrographic Office Memorandum for Aviators, No. 17, September 17, 1948, before any changes or modifications of any aid to air navigation, such as realignment of radio ranges, modified instrument approach procedures, relocation of fan markers, etc., can be published by the Hydrographic Office, the Command requesting the change must first obtain approval from the Office of Chief of Naval Operations, Navy Department, Washington 25, D. C. When an approved change or modification has been made to any aid to air navigation, the Command shall immediately notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C.

All Naval Air Stations and Air Facilities are directed to notify the U. S. Navy Hydrographic Office, Division of Air Navigation, Washington 25, D. C., direct, of all contemplated or immediate changes in their field facilities, operation rules, air-ground communication facilities, GCA, etc., and other factors affecting safe operation of aircraft which do not necessitate approval from CNO. This may be done by letter, speedletter, or dispatch, as applicable.

In accordance with Chief of Naval Operations Aviation Circular Letter 19-49 March 2, 1949, approval for the closing of any Navy or Marine Corps Air Station or Air Facility to transient military aircraft for a period in excess of ten days must be obtained from the Chief of Naval Operations.

Commanding Officers of Naval and Marine Corps aviation activities are directed to review all information published by the Hydrographic Office, U. S. Air Force, Civil Aeronautics Administration, and Coast and Geodetic Survey on facilities under their command and immediately forward any corrections or approved amendments direct to the publishing agency. A copy of the corrections or amendments to information published by other agencies should be forwarded to the Hydrographic Office. The charts and publications issued by the above-mentioned agencies must be currently maintained in order that all aviators can be kept informed of changes to airfields, seaplane anchorages, navigational aids, and other factors affecting the safe operation of aircraft.

AIR FORCE SPECIAL NOTICES

AIR FORCE DATA: Advice covering Air Force fields or Air Force operations on civil fields, or Air Force radio facilities, and also Air National Guard fields and facilities should be forwarded to: Commanding Officer, Aeronautical Chart & Information Service, Washington 25, D. C.; Attn: Aeronautical Information Division.

Requests for approval of the closing of Air Force airfields or restrictions in airfield facilities to transient military aircraft for over ten days should be forwarded through channels to Headquarters, U. S. Air Force. Restrictions in Air National Guard fields or facilities will be forwarded to the National Guard Bureau through the State Adjutant General for approval. Information to be published will be coordinated and submitted to the Civil Aeronautics Administration by Headquarters MATS.

In connection with the above, the attention of all base operations officers is invited to A. F. Regulation 55-12 of July 1, 1949, subject, "Notices to Airmen", A. F. Regulation 5-16 of February 20, 1948, subject, "Responsibilities for Flight Publications", and to A. F. Regulation 60-23 of September 23, 1947, subject, "Restrictions on Landing at Army Airfields".

AIR FORCE OFFICIAL BUSINESS: Air Force official business within the meaning of Air Force Regulation 85-2 is interpreted as the necessity for personnel aboard an aircraft to contact personnel, units, or organizations at or near the airfield selected for landing for the purpose of conducting transactions in the service of, and in the interest of, the United States Government. This does not include the use of an airfield by transient aircraft for the purpose of obtaining clearance, service, or other items attendant to itinerant operations. Cross country flights for the purpose of maintaining flying proficiency are not considered to be official business within the meaning of this regulation.

VHF CHANNEL ASSIGNMENTS FOR AIR FORCE, NAVY, COAST GUARD AND ARMY

Listed below are Standard VHF Channels for the Air Force, Navy, Coast Guard and Army.

AIR FORCE*	NAVY ARC-1** receivers	NAVY ARC-3, -5 SCR-522***	COAST GUARD	SERVICE

*Headquarters, USAF has directed following utilization only for communications as listed with a view to eliminating congestion: Channel A: IFR flight and such other traffic as required by CAA; Channel B: Immediate aircraft movements within control zone of airport; Channel C: Routine IFR and VFR flights and "company business".

**This frequency plan is effective upon completion of modification AN/ARC-1 guard channel in accordance with BuAer Technical Order to permit tuning to 121.5 mc. Prior to completion of this modification, 140.58 mc for CAA Airways will be carried in guard channel of AN/ARC-1 equipment, and 121.5 mc in Channel 1.

***In 4 channel equipment (ARC-5 and SCR-522) 132.3 mc or 142.02 mc may be substituted on Channel C and D in accordance with operational requirements.

UTILIZATION OF CAA VAR STATIONS BY MILITARY AIRCRAFT: The attention of pilots is directed to the fact that voice facilities are available at many VAR stations (see pages 90 thru 103, A.N. 08-15-1), and CAA communications stations are located thereat. Such VAR facilities should be utilized for navigational aid and communications services, particularly when standard low frequency facilities are not available.

✓ Indicates new or revised Special Notices

AIR FORCE FOREIGN CLEARING STATIONS: Under the authority of Air Force Regulation 60-8 of July 6, 1949, U. S. Air Force aircraft with destinations listed below or returning therefrom to the United States will clear through the stations indicated:

AFRICA and AZORES: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; or Westover AFB, Mass.

ALASKA: McChord AFB, Wash.; Great Falls AFB, Mont.; or Travis AFB, Calif.

BERMUDA: Mitchel AFB, N. Y.; Brookley AFB, Ala.; MacDill AFB, Fla., Washington National Airport, D. C.; Travis AFB, Calif.; or Westover AFB, Mass.

CANADA: Great Falls AFB, Mont.; Brookley AFB, Ala.; McChord AFB, Wash.; Washington National Airport, D. C.; Selfridge AFB, Mich.; Westover AFB, Mass.; or Mitchel AFB, N. Y.

CANAL ZONE and MEXICO: March AFB, Calif.

CANAL ZONE, CENTRAL AMERICA, MEXICO, AND SOUTH AMERICA: MacDill AFB, Fla.; Kelly AFB, Texas; Brookley AFB, Ala.; Washington National Airport, D. C.

CARIBBEAN: Brookley AFB, Ala.; Kelly AFB, Texas; MacDill AFB, Fla.; Washington National Airport, D. C.

ENGLAND, GREENLAND, ICELAND, AND NORTH IRELAND: Washington National Airport, D. C.; or Westover AFB, Mass.

EUROPEAN THEATER: Brookley AFB, Ala.; MacDill AFB, Fla.; Washington National Airport, D. C.; Westover AFB, Mass.; or Kelly AFB, Texas.

HAWAII: Travis AFB, California.

NOVA SCOTIA and NEWFOUNDLAND: Washington National Airport, D. C.; Westover AFB, Mass.; Selfridge AFB, Mich.; Brookley AFB, Ala.; or Mitchel AFB, New York.

The classified "Foreign Clearance Information Guide", published by Aeronautical Chart and Information Service and now distributed to all Air Force bases should be consulted prior to departure for foreign clearing station, particularly with regard to diplomatic requirements for country for which clearance is desired, in order that appropriate advance notice of flight may be given and delay at foreign station may be avoided.

CURRENT FEDERAL AIRWAYS MANUALS OF OPERATION: The following publications are now distributed in accordance with AF Regulation 5-12, and supersede listing given in paragraph 5 of this regulation. Base operations officers, weather and communication units should check copies in use to insure that latest issues and all revisions are available. Mailing lists are now maintained in accordance with groupings of material as follows:

GROUP I MATERIAL: II-B. Instructions for the Operation of Communications Facilities, First Edition, January 15, 1950 (This replaces II-B-2, II-B-3, II-B-5, II-B-7, II-B-8 and II-B-11); M-59, November 5, 1949 (Service "B").

GROUP II MATERIAL: Location Identifiers, Fourth Edition, July 1, 1950, with two revisions.

GROUP III MATERIAL: Contractions, Fourth Edition, December 1, 1949.

GROUP IV MATERIAL: Civil Airways Mileage Chart of Dec. 27, 1950.

GROUP V MATERIAL: Teletype Service "A" Manual, September 19, 1950; Teletype Service "C" Manual, January 9, 1951; Teletype Maps: M-11 December 1, 1949, and M-14, April 15, 1950 (Service "A"); M-10, October 1, 1949, and M-13, November 1, 1950 (Service "C"); M-58, August 15, 1950 (Service "A", "C", and "O").

GROUP VI MATERIAL: Teletype Service "O" Manual, May 1, 1950, with 6 revisions; Teletype Maps M-89, February 1, 1950 (Service "O") and M-58 (Service "A", "C" and "O").

Requests for distribution should be directed to Commanding Officer, Aeronautical Chart and Information Service, Washington 25, D. C. Attn: Aeronautical Information Division.

NEW USAF POLICY REGARDING USE OF INACTIVE FIELDS: In accordance with directive from Headquarters, USAF, Air Force fields which are on inactive status and are listed in the Directory as "INACT-NO FACS" will in the future be closed to all USAF pilots not possessing their own clearance authority in accordance with AFR 60-16, unless on official business with written orders.

COMPULSORY REPORTING POINTS - VAR RANGE FACILITIES: VAR Facilities designated by CAA and shown on radio facility charts as Compulsory Reporting Points will be applicable to USAF aircraft only if the aircraft is equipped with the necessary instruments and radio frequencies and if a flight plan has been filed with ATC declaring the intention to utilize these facilities. When ATC clearances include instructions using these facilities and the aircraft is not equipped for such use, the pilot should so advise the traffic control agency and request amended traffic control instructions.

PROVISION OF PLAIN LANGUAGE TERMINAL FORECASTS: All CAA communications facilities now provide Air Force pilots with terminal forecasts in plain language upon request. Terminal forecast information for all Air Force bases and for Patuxent River Naval Air Station, Maryland, will be available. Pilots should make full use of this service in requesting weather information.

SPECIAL CHARTS OF ATOMIC ENERGY AIRSPACE RESERVATIONS: The Atomic Energy Commission has issued a special chart depicting airspace reservations in the United States. Copies of this chart are being supplied each Air Force Base, AF Reserve Unit, National Guard Unit and other activities on the same mailing list basis as used for Airman's Guide. Operations officers should prominently display this chart and assure that pilots contemplating flight adjacent to these areas are briefed upon their existence, location and restricted status.

CHANGE FOR PILOT'S HANDBOOK (WEST) U. S.: Additional procedure: Edwards AFB, Muroc, Calif. Elev. 2285' MSL, type: BMRL, Freq: 396 kc, ident: MUF. Ceiling minimum: 500'. Initial apch: N-minimum enroute alt; E - 6000' from intsxn NE crs PMD rng; S - 6000' from intsxn NE crs PMD rng; W - 10,000' from intsxn NW crs PMD rng. Shuttle E crs MUF rng 6000' within 25 mi. Final apch crs: W. Procedure turn: S side W crs 4500' within 25 mi. Alt over Edwards rdo rng on final apch 3700' MSL. Magnetic bear. and distance, Edwards rdo rng to arpt: 064°, 2.2 mi. If visual ctc not established within 2.2 mi after passing Edwards rdo rng, climb to 6000' MSL on E crs.

CIVIL SPECIAL NOTICES

CIVIL DATA: The Airman's Guide covers primarily two broad fields of civil airport information, namely so-called permanent data changes and temporary hazardous conditions. Permanent airport data refer to new airports or changes in field layout or servicing, lighting or permanent obstructions on existing airports. Temporary hazardous conditions refer to conditions that make such airports temporarily unusable or usable only with caution. Such hazardous conditions could be, for example, a field closed because of floods, spring thaws, or construction, or merely a burned-out obstruction light or a runway partially unusable because of construction.

Obviously, temporary hazardous conditions should be reported to the aeronautical public at once. The necessity for reporting additional aids or minor changes in existing aids, however, isn't nearly as cogent. In other words, a temporarily closed airport is ordinarily of much more importance from a safety viewpoint than is a new airport, and the aeronautical public should be told about it as expeditiously as possible.

Notamizing of advice covering a field unusable because of flood or snow, a runway closed because of construction, or the erection of a pole-line in an approach, doesn't necessitate an engineering background on the part of the reporter. Too, safety frequently necessitates the notamizing of such advice before an official check can be made. On the other hand, advice covering permanent airport data changes, such as a new airport, or a lengthened landing strip, or an additional hangar, obviously doesn't require the same expeditious transmission to the aeronautical public, and the data may be checked from an engineering standpoint and for standardization before being publicized.

SUMMATION: (a) Since the aeronautical public should be immediately advised of hazardous condition, reporters should utilize the CAA Airway Communications Stations.

(6-5-51)

The item to be reported, therefore, should either be telephoned or mailed to the nearest communications station for dissemination as a notam and for further transmission to the publishers of the Airman's Guide. (If this is not feasible the items should be reported directly to the Office of Aviation Development, Attention: W-155, C.A.A., Washington 25, D. C.)

(b) Permanent airport data changes (as differentiated from temporary hazardous conditions) should be reported to the appropriate C.A.A. District Airport Engineer for coordination before they are included in the Airman's Guide.

FLIGHTS INTO CANADA: No photographic equipment may be installed in, nor may any photographs be taken from any U. S. aircraft operating in or over Canadian terriroty.

OMNIRANGE USE: The effectiveness of the omnirange (VOR) depends upon proper use and adjustment of both the ground and airborne equipment. Certain minor irregularities may be observed in using VOR facilities, such as apparent course roughness, course deflections and/or limited distance range. Pilots flying over unfamiliar routes are cautioned to be on the alert for these apparent vagaries.

CIVIL USAGE OF MILITARY FIELDS: U. S. Air Force and Navy fields are open to civil fliers only in emergency or with prior permission of the commanding officers thereof.

DIRECTORY OF AIRPORTS AND AIR NAVIGATION RADIO AIDS NOTAMS: Because of space limitation, the Airport Directory and Air Navigation Radio Aids perforce serve as a notam supplement. Notam data revising a previous Directory or ANRA are indicated by prefixed arrows. The only airport or radio data (other than temporary conditions of short duration) carried in the Notices to Airmen Section are facility coordinates, post-deadline data, or data impossible to incorporate in the two above tabulations.

VHF OMNITEST SIGNAL FACILITIES: Experimental VHF omnitest signal facilities have been installed at the New York (LaGuardia 112.0 mc), Chicago (Midway 112.0 mc), and Kansas City (Municipal 113.0 mc) airports. These facilities cannot be used for navigational purposes but permit checking of aircraft navigational VOR receivers during a ramp test or while in flight near the airport. Voice communication is not available on the test signal frequency. The facility radiates a 0° course in all directions with a power output of about 10 watts. The identification consists of continuous dots without voice. Each facility is continuously monitored and will shut down automatically if the 0° course varies by more than one degree from normal or in case the identification fails. Flight checks indicate that the omnitest signal is usable to a distance of about ten miles at minimum instrument altitude although regions of weak and unreliable signal may be encountered at shorter distances. The omnitest signal may be regarded as dependable when there is no flag alarm showing or where no flag alarm is incorporated in the aircraft unit and the identification is received free from interference and noise. Comment from airmen will be appreciated. Please forward same to: Civil Aeronautics Administration, Washington 25, D. C., Attention: W-380.

RECEIVER OMNITEST PROCEDURE - Receivers with omni-Bearing Selectors (OBS)

Tune in omnitest frequency. The "To-From" indicator should read "To" or "From" and the alarm flag, if one is used, should disappear.

Set OBS in vicinity of 0° to center "Deviation" indicator. The "To-From" indicator should read "From" and the difference between 0° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

Set OBS in vicinity of 180° to again center "Deviation" indicator. The "To-From" indicator should read "To" and the difference between 180° and the actual OBS reading indicates the amount of calibration error in the airborne equipment.

With the "Deviation" indicator centered in the 180° position rotate OBS clockwise until "Deviation" indicator reads full scale or five dots to left. Note OBS reading. Next rotate OBS counterclockwise until "Deviation" indicator reads full scale or five dots to right. Note OBS reading. The difference between the two OBS readings is a measure of receiver course sensitivity.

If instrumentation includes a radio magnetic indicator (RMI), the pointer on this instrument connected to the receiver being checked should be observed. This pointer should indicate 180° ± 1 degree regardless of the setting of the OBS.

AUTOMATIC INDICATING RECEIVERS: Automatic indicating receivers do not have an Omni-Bearing Selector or a "To-From" indicator and have no ambiguity. The only course that can be checked is the one indicated when the equipment is receiving the 0° (magnetic north) radial from the station, which is automatically indicated when the receiver is turned on and tuned to the correct signal frequency. Either 0° or 180° will be indicated depending on the sensing designed into the particular receiving equipment (as described in the instruction book for that equipment).

FLYING OVER FOREIGN TERRITORY: All aircraft operators are urgently cautioned that no over-flights of foreign territory should be made without authorization from the foreign government concerned, and then only in accordance with authorized procedures.

Safety of crews, passengers and aircraft require that every precaution be taken to follow such procedures, particularly with Iron Curtain countries.

DIRECT COMMUNICATIONS WITH AIR ROUTE TRAFFIC CONTROL CENTERS:

The CAA has inaugurated a procedure whereby pilots operating on IFR flight plans may have direct communication with air route traffic controllers at certain control centers. VHF on a simplex basis (call-up and reply on the same frequency) is used. This enables the controller to issue traffic clearances and receive indications of compliance therewith in such a manner that all air traffic is expedited. The center will guard the assigned frequency. However, each specific aircraft, with which the center desires to establish direct communication for control purposes, will receive a clearance through the appropriate CAA, AACS or Air Carrier Communications Station, indicating the time or place the controller desires to communicate directly with the pilot.

The following locations at which this direct communications procedure is available are also listed in the Air Navigation Radio Aids Section of the Airman's Guide. Each one is listed alphabetically following the tower listing. When additional locations establish this procedure they will be similarly listed:

Radio Call	Frequency	Commissioned
Atlanta Center	120.3 mc	July 1, 1950
Boston Center	120.3 mc	Jan. 22, 1951
Chicago Center	120.3 mc	May 10, 1949
Cincinnati Center	120.3 mc	Mar. 28, 1951
Cleveland Center	120.3 mc	Nov. 3, 1950
Detroit Center	118.9 mc	Dec. 21, 1950
Ft. Worth Center	120.3 mc	April 29, 1951
Kansas City Center	120.3 mc	Feb. 8, 1951
New York Center	120.3 mc	Oct. 11, 1950
	120.7 mc	Jan. 25, 1950
Oakland Center	120.3 mc	Oct. 30, 1950
Pittsburgh Center	118.9 mc	Nov. 2, 1950
St. Louis Center	118.9 mc	Mar. 15, 1951
Salt Lake Center	120.3 mc	Jan. 24, 1951
San Antonio Center	120.3 mc	April 17, 1951
Seattle Center	120.3 mc	March 8, 1951
Washington Center	120.3 mc	Sept. 1, 1949

ON-REQUEST REPORTING POINTS: Effective immediately, the following on-request reporting point is established: BRACEY INTSXN - Intsxn of the NE crs of Raleigh, N. C. and the NW (aural) crs of Rocky Mount, N.C. Effective immediately the ORANGE on-request reporting point (intsxn NE crs Willow Grove, Pa. and W crs Newark, N. J.) is deleted.

AIR ROUTE TRAFFIC CONTROL AREA BOUNDARY AMENDMENTS: Concurrently with amended control areas 0001 EST, May 29, 1951, the Atlanta and Miami air route traffic control assume jurisdiction as follows:

ATLANTA: Green civil airway No. 5 from Knoxville, Tenn. omnirng stn to 15 miles E of Pikeville, Tenn. omnirng stn, via the direct enroute and 15° S altitude change radials, including all that area bounded on the N by Green civil airway No. 5 and on the S by the Pikeville-Knoxville direct enroute radials; Amber civil airway No. 6 from the Chattanooga, Tenn. omnirng stn to 24 miles NW of Chattanooga omnirng stn, via the direct enroute and 15° SW altitude change radials to Nashville, Tenn. omnirng stn, and from Macon, Ga. omnirng stn to 21 miles NW of Alma, Ga. omnirng stn, via the direct enroute and 15° NE altitude change radials; Red civil airway No. 10 from the Augusta, Ga. omnirng stn to 22 miles E of Augusta, via direct enroute radial and 15° S altitude change radial to Charleston, S. C. omnirng stn; Red civil airway No. 16 from 22 miles N of Albany, Ga. omnirng stn to Macon, Ga. omnirng stn via direct enroute and 15° W altitude change radials, from the Augusta, Ga. omnirng stn to 12 miles SW of Columbia, S. C. omnirng stn via the direct enroute radials; Blue civil airway No. 28 from the Spartanburg, S. C. omnirng stn to 55 miles SE of Spartanburg omnirng stn via the direct enroute and 15° NE altitude change radials to Columbia, S. C. omnirng stn.

MIAMI: All of Amber civil airway No. 7 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from the West Palm Beach, Fla. omnirng stn to the Vero Beach, Fla. omnirng stn via the direct enroute and 15° E altitude change radials; from the Vero Beach, Fla. omnirng stn to a point 48 miles N of Vero Beach omnirng stn via the direct enroute and 15° W altitude change radials to the Daytona Beach, Fla. omnirng stn. All of Red civil airway No. 25 including all that area within 5 miles either side of the enroute and altitude change radials and the area between the altitude change and enroute radials from a point 60 mi SE of the Tampa, Fla. omnirng stn via the direct and 15° W altitude change radials from the Tampa, Fla. omnirng stn to the Ft. Myers, Fla. omnirng stn thence to the Miami, Fla. omnirng stn via the direct enroute and 15° SW altitude change radials.

DVFR FLIGHT PLANS: When an IFR flight plan is canceled, a DVFR flight plan should be filed if the provisions of Part 620 of the Regulations of the Administrator will be applicable to any portion of the remainder of the flight.

INSTRUMENT APPROACH PROCEDURES: The standard instrument approach procedures for the following airports have been CANCELLED: Low Frequency Range: (1) Inyokern, Calif., Inyokern NAF, effective April 2, 1951. (2) Smithville, Tenn., Smithville Arpt., effective May 11, 1951. VHF (VAR) Radio Range: Santa Barbara, Calif., Santa Barbara Arpt., effective May 11, 1951. Automatic Direction Finding: Camarillo, Calif., Camarillo-Ventura Co. Arpt., effective May 11, 1951.

DANGER AREA DESIGNATIONS: The following Danger Area amendments shall be effective as dated unless otherwise advised:

AMENDMENT NO. 72 (June 15, 1951)

1. The Holtville, California area, published on April 21, 1949, in 14 F. R. 1913, and amended on June 23, 1949, in 14. F. R. 3393, on July 14, 1949, in 14. F. R. 3886, and on November 30, 1949, in 14 F. R. 7198, is revised to read: Location: Holtville (San Diego Chart); Description: Target 68: A circular area having a radius of 3 miles centered at lat. 32-57-20, long. 115-12-35; Target 94: A circular area having a radius of 1-1/2 miles centered at lat. 32-52-25, long. 115-09-57; Target 95: A circular area having a radius of 3 miles centered at lat. 33-02-35, long. 115-17-12; Impact Area: Beginning at lat. 32-58-30, long. 115-03-50; SE to lat. 32-51-30, long. 114-55-00; due W to long. 115-04-00; NW to lat. 32-57-30, long. 115-09-50; due N to lat. 32-58-30; due E to lat. 32-58-30, long. 115-03-50, point of beginning; Altitudes: Surface to unlimited; Time: Continuous; Using Agency: Commandant, 11th Naval District, San Diego, Calif.

(2) The Upper Lake Huron, Michigan area, published on June 23, 1949, in 14 F. R. 3393, is amended by changing the "Using Agency" column to read: "Oscoda AFB, Michigan."

(3) A Bogue Sound, N. C. area is added to read: Location: Bogue Sound (Norfolk Chart); Description: (3) Circle with 3 mile radius centered at lat. 34-41-00, long. 76-55-00; Altitudes: Surface to 10,000 feet; Time: Daylgt hrs only; Using Agency: Marine Corps Air Station, Cherry Point, N. C.

(4) A Wendover, Utah area is added to read: Location: Wendover (Salt Lake City Chart); Description: Dugway Proving Ground Area - Beginning at lat. 40-25-00, long. 112-53-00; S to lat. 40-15-00; E to long. 112-46-20; S to lat. 40-08-00; E to long. 112-43-00; S to lat. 40-03-00; W to long. 112-45-20; S to lat. 40-01-00; W to long. 112-46-30; N to lat. 40-02-00; W to long. 113-14-00; N to lat. 40-04-15; W to long. 113-20-30; N to lat. 40-15-00; E to long. 113-14-00; N to lat. 40-20-20; E to long. 113-07-00; N to lat. 40-25-00; E to lat. 40-25-00, long. 112-53-00, point of beginning; Altitudes: Surface to 40,000 feet; Time: Continuous; Using Agency: 617th Air Force Base Unit, Dugway Proving Ground, Tooele, Utah.

AMENDMENT NO. 73 (June 12, 1951)

The Haven, Wisconsin area, published on March 30, 1950, in 15. F. R. 1783, and amended on August 18, 1950, in 15 F. R. 5497, is revised to read: Location: Haven (Milwaukee and Green Bay Charts); Description: Beginning at lat. 44-02-30, long. 87-28-00; SE to lat. 43-57-05, long. 87-22-10; due S to lat. 43-47-00; SSW to lat. 43-37-05, long. 87-27-10; NW to lat. 43-48-00, long. 87-42-30; due W to long. 87-47-50; due N to lat. 43-55-30; due E to long. 87-41-00; NE to lat. 44-02-30, long. 87-28-00, point of beginning; Altitudes: Surface to 85,000 feet; Time: 0600 to 2000 daily; Using Agency: Hdg., 5th Army, Chicago, Illinois.

AERONAUTICAL CHART CORRECTIONS: Correct the Dallas Sectional Aeronautical Chart, dated March 2, 1951, as follows: What is now shown as Klotz Airport, Garland, Texas, lat. 32-54-00, long. 96-40-45, should be named Luscombe Airport, with longest runway length 4700'. Also at lat. 32-55-15, long. 96-46-15 is shown Luscombe Airport. This should read Highland Park Airport, longest hard surfaced runway 2380'.

Correct Des Moines, Iowa Sectional Chart, dated May 12, 1951 as follows: Radio bcn symbol as Hunter Airport, Cedar Rapids, should be shown as Cedar Rapids Airport.

NON-STANDARD HOLDING PATTERNS: The following changes and additions to non-standard holding patterns were effective February 1, 1951.

(1) The Ft. Foote ADF has been changed to the Washington ADF. Hold between the Washington rng stn and the Mt. Vernon non-directional rdo bcn, all turns left, minimum alt 1500'.

(2) Ft. Foote holding pattern: Hold on the lclsr crs of the ILS between the OMK and a point 2 minutes S on the W side of the course. All turns left. Minimum altitude: 1500'.

(3) Hains Point ADF: Hold between the Riverdale MHW and the LMM of the Washington ILS. All turns left. Minimum altitude: 5500'.

(4) Riverdale Holding pattern: Hold NE and on the W side between the Riverdale MHW and a point 1 minute NE with an inbound track of 214°. All turns right. Minimum altitude: 1800'.

(5) Arcola, Va. Radio: All turns to the right instead of to the Left. Still non-standard holding pattern SW direction on W side. Minimum altitude: 3000'.

MAGNETIC VARIATION CHANGES: The following change in magnetic variation is the result of the application of 1950 isogonic lines to aeronautical charts: The new magnetic courses for this range is shown in the listings in the Air Nagigation Radio Aids Section. Station: Princeton (VOR), Maine; Present Variation: 20 W; Old Variation: 21 W.

5-5-51

CHANGES IN WEATHER REPORTING FORM

Weather Broadcasts by CAA Communications Stations - Effective June 1, 1951, weather broadcasts from CAA Communications Stations will reflect certain changes in the form of aviation weather reports which are being made effective by the U. S. Weather Bureau as of that date. The new weather report form will list multiple cloud layers in ascending order of height, and changes noted in broadcast phraseology will be principally for the purpose of describing the cloud and ceiling conditions as reported. In this connection, it is recommended that all interested persons obtain from the U. S. Weather Bureau the pamphlet, "What's the Ceiling?", which explains in detail the improvement in form of aviation weather reports.

The principal changes covered in this pamphlet are as follows:

1. All cloud layers will be reported in ascending order of height.
2. Thin cloud layers will not be reported as a ceiling.
3. All ceiling layers will be identified by a letter designator.
4. "X", "-X" will be used to report obscurations on the ground only.
5. Peak gusts of wind will be reported immediately following the current wind speed rather than in remarks.
6. Intensity classification for wind shifts and squalls have been discontinued.
7. A new precipitation intensity "very light" has been established. The new teletype abbreviation for this intensity is "minus minus".

AIRPORT AND RADIO NOTICES

LEGEND

(3-31) - Month and day item reported.
** - New or revised airport, danger area, or miscellaneous data to be inscribed on charts or added to records.
★ - New or revised radio data to be inscribed on charts or added to records.
NOTE: - Because of space limitation such items are cited only once. The erection and removal of radio station towers, water tanks, oil derricks, and permanent airport obstructions are examples of material cited only once.

ALABAMA: ALBERTVILLE ARPT: 200' NW end NW/SE Strip ruf. (3-19)
ANNISTON-RADIO: Omnirng gnd checked only. (4-4)
ANNISTON ARPT: Strips being extended. Avoid new extensions. (5-17)
BIRMINGHAM ARPT: 2-way rdo rqrd ngts, rcvr days. (5-23) No Navy acft svcg avail from lcl sunset to 0800 CST. Crash and rescue facs avail 2400-0700 on 1 hr req to NAS. (5-30)
BROOKLEY AFB (MOBILE): Acft making VFR descent to Brookley under low visibility conditions will let down S of Mobile to avoid Bates Fld and G-6 Arwy tfc. (1-29)
EVERGREEN-RADIO: About June 5, omnirng will be shut down until approx July 20 - modernization. (6-4)
MAXWELL AFB (MONTGOMERY)-RADIO: USAF rng crs have multiples 20 mi from stn. (5-10)
MAXWELL AFB (MONTGOMERY): At ngt or under IFR conditions large depot 1 mi S looks like arpt and lgts give impression of parallel rnwys. (9-20) Rnwy 5-23 clsd (const). (5-7)
MONTGOMERY-RADIO: April 20, omnirng shut down.
MUSCLE SHOALS ARPT: Lgts on Rnwys 6-24, 18-36 inop. (3-19)
TUSCALOOSA-VAN DE GRAAFF ARPT: Use paved Rnwy 11-29 at own risk. Use sod area N of and parallel to paved rnwy. Apron under const. (5-29)
ARIZONA: DAVIS-MONTHAN AFB (TUCSON): E fld clsd, acft parked on rnwys. (4-2)
HASSAYAMPA-RADIO: About June 4, omnirng will be commd. Freq: 115.9 mc. Ident. HYM. Lctd lat 33-27-00, long. 112-50-05. Class will be: VORW. Monitoring category (3).
LUKE AFB (PHOENIX): Ctn - exten const all rnwys. (2-19) Rnwy 3-21 clsd (const). (5-2)
PHOENIX-SKY HARBOR ARPT-TOWER: From Mar. 26, until approx June 26, rdo equip. being moved to new twr. During this period short interruptions. (3-14)
ARKANSAS: BENTON ARPT: W half N/S Strip clsd (const). (2-7)
BENTONVILLE ARPT: 51' bcn twr being erected E side adj to N end of hangar. (4-13)
BRINKLEY-FEDERER MEMORIAL ARPT, SITE 37, DAL-LOU: Clsd ngts. Rows of dirt on SW end NE/SW Strip, use emerg only. (5-17)
CLARKSVILLE ARPT: E/W Strip clsd. (2-12)
FAYETTEVILLE-RADIO: May 1, omnirng shut down until approx July 20-modernization.
FAYETTEVILLE ARPT: 75' twr being erected NW corner between hangar and hwy. (5-8)
FLIPPIN-RADIO: About June 18, INSAC will be comm. Transmitting 115.1,111.1,135.0, 135.9,121.5 mc, 206 kc; rcvg 3105 kc; 121.5,122.1,126.7,135.9 mc. Class: BVOR-DTVJ. (5-24) Monitor. category (1). (5-28)
FT. SMITH-RADIO: About June 18 omnirng will be shut down until approx Sept. 16-relctn. (5-15)
FT. SMITH ARPT: Equip on W end E/W Rnwy. (4-9)
LITTLE ROCK-ADAMS FLD-TOWER: Transmission and reception poor on all VHF freqs S to W account obsts near temp twr until approx Aug 1. Apch ctl on 353 kc shut down. (5-14) FLD: Ctn lndg N or NE, vision of ctl twr partially obstd. (5-14) Lmtd NG svcg. (10-24)
WALNUT RIDGE-RADIO: Omnirng radials 290-320° and 120-150° have severe bends and crs roughness. (3-2)
**WALNUT RIDGE ARPT: 210' obstn lgtd twr Rdo Stn KOCP erected 4 mi S (191° T) at lat. 36-03-58, long. 90-56-24. (5-8)
CALIFORNIA: ARCATA ARPT: Ctn - const days. Use rnwys only. (2-7)
BURBANK-LOCKHEED AIR TERMINAL: Clsd to all trans P-80 acft xcpt on special projects for modification. (7-3) Clsd to all trans jet acft. (11-20)
CAMARILLO: Drone acft will fly in a corridor 1000 yds wide beginning at Oxnard Flgt Strip at lat 34-13-00, long. 119-05-00; thence to lat. 34-08-35, long. 119-04-06; thence direct to the E bndry of the Point Mugu Airspace Warning Area at lat 33-57-30, long. 119-08-30. Drone acft will oper below 300' during VFR wea conditions from 0800 to 1 hr before sunset, daily, Mon thru Sat.
CASTLE AFB (MERCED): Acft parked on lndg mat. Use Rnwy 12-30 only. (6-28)
CHINO-PACIFIC AIRMOTIVE ARPT: Ctn - F-51 and C-54 acft operg in vcnty. Ac ft parked on mat area; taxying on rnwys. (3-13)
CRESCENT CITY-RADIO: Omnirng radials 90° thru 180° to 270° usable dist 25 mi. (10-10)
CRESCENT CITY-DEL NORTE CO. ARPT: Drifting sand across W end taxi strip leading to Rnwy 11. Use rnwy for taxying only. (5-18)
CULVER CITY ARPT: Soon, arpt will be perm clsd. (5-16)
CULVER CITY-HUGHES ARPT: Entire fld clsd xcpt NW half Strip 4-22. Usable portion mrkd day, ngt. Clsd trans acft xcpt on prior permission. (3-9)
EDWARDS AFB (MUROC): Lctd within a danger area. Acft will not carry trans passengers to this fld. Ctc twr at least 25 mi out during daylgt hrs for permission to cont to fld. (4-23)
FT. ORD (MONTEREY): P-lines and rising elev 1/4 mi E. Lnd only in area mrkd in white. (10-24)
FRESNO AIR TERMINAL: Open trenches and vehicles adj rnwys, taxiways. (3-11)
GEORGE AFB (VICTORVILLE): Ctn - rnwys under repair. (8-3)
HAYWARD ARPT: Rnwy 10R-28L reserved for acft with cruising speed greater than 130 mph. Rnwy 10L-28R reserved for acft with cruising speed less than 130 mph. (4-5)
LOS ANGELES-AIR ROUTE TRAFFIC CONTROL CENTER-RADIO: About June 14, transmitter and rcvr 120.3 mc will be comm. (5-7)
LOS ANGELES INTN'L ARPT-TOWER: Effect. Apr. 9 until approx June 8, voice communs may be interrupted for short periods during new twr const. About June 20 until approx July 2, ASR and PAR will be inop. (5-31) FLD: Rnwy 4-22 clsd (const). Rnwy 7L-25R usable portion 4500' from apch end 25R. Const across W end Rnwy 25R. 100' crane, equip on and adj const area. Use paved areas only. Rnwy 25R clsd take-offs. Rnwy 7L clsd lndgs 0700-1700 daily xcpt Sat and Sun. Two green transverse bar lgts mrk threshold Rnwy 25L. Because of new twr const approx 1/2 mi of tfc pat S of arpt not visible to twr controllers. (5-31)
MARCH AFB (RIVERSIDE): Formations more than 15 acft expect delay more than 1 hr. (1-15)
MATHER AFB-TOWER: USAF GCA inop. (4-25)

[redacted]: ★McCLELLAN-RADIO: Bear., dist H fac to McClellan AFB: 162°,3.2 mi. Correct coordinates: lat 38-43-00, long. 121-24-00. (5-24)
★MIRAMAR NAAS-RADIO: Bear.,dist Navy rng to Miramar NAAS: 327°, 3.3 mi. (5-14)
MOFFETT NAS (MTN VIEW): Max. wheel load: Rnwy 14L-32R, 40,000 lbs; Rnwy 14R-32L, 30,000 lbs. (2-21)
NORTON AFB (SAN BERNARDINO): Ctn - equip on fld days. (3-29)
OAKLAND-RADIO: Omnirng maximum usable dist, 40 mi N thru E at minimum instr alt. (2-28)
OAKLAND ARPT: Rnwy 6-24 clsd. Channel clsd to seaplanes, LST craft moored in channel. Lgt acft use gravel area. Large acft use concrete taxiways. Const vcnty hangar 5 and lndg area from hangar 3 to W bndry. (3-8)
SAN DIEGO-RADIO: Omnirng operg on test-basis, awaiting flgt-check. (5-4)
SAN DIEGO COUNTY (BROWN) FLD: All acft maint 1100' MSL in pat, due to joint opers with Navy. Lgt acft lnd on blacktop only. No opers Sat, Sun, or holidays. (4-30)
SAN DIEGO NAS: Tfc circle oval in shape with left turns at 800'. Lndg will not be made without passing thru Point Love (black and orange checkered floating pyramid) unless directed by twr. Point Love is lctd 1.5 mi S of Hotel Del Coronado. Multi-eng acft lnd on hvy duty rnwys, single-eng acft on asphalt mat. Maint at least 1500' over Coronado, Amphibious Base, tfc lanes at North Island. (2-21)
SAN DIEGO NAS SEAPLANE BASE: Sealane mrkrs under const. Perm pile-mounted day mrkrs and seadrome lgts are being installed in S San Diego Bay to delineate the sealanes. There are two sealanes each 1000' wide, extending NW/SE, 14, 875'; E/W, 9,872'. Bndrys and ends of lanes mrkd, day, ngt. Ctn during lndg and take-off. It is also noted that due to mrkrs being pile-mounted the height above water will vary with the state of the tide.
SAN FRANCISCO: Exten mil air activity at all altitudes. (9-6) Civil pilots use extreme ctn when flying near Hamilton AFB due to extreme rate of closure between jet acft and small civil acft. (1-17)
SAN FRANCISCO ARPT-TOWER: CAA ILS Lclzr operg with slight scalloping. (1-26) FLD: Apch lgts inop. Rnwys clsd days intermittently. Turf area clsd. Equip on fld. (1-26) Const on apron adj Intnl Terminal, mrkd. Taxi with ctn. (5-17)
SANTA ANA MCAF-LTA: Hrs opern: 0800-1630,Mon-Fri and to sunset on 30 min req. 0800-1200,Sat and to sunset on 30 min req. 0800 to sunset Sun on 30 min req. (5-18)
SANTA BARBARA-RADIO: May 22, visual-aural rng flgt-checked, crss correctly realigned Rng to be used for enroute flying only. Soon omnirng will be commd. Freq: 114.9 mc. Ident: SBA. Lctd lat 34-30-36, long. 119-46-13. Class will be: VORW. (5-22)
SANTA BARBARA ARPT: Taxiway 3 between intsxn with Taxiway 4 and apch end Rnwy 25 perm clsd to acft with 20,000 lbs or more gross wt. Threshold lgts Rnwy 7 inop. Extension apch end Rnwy 7 usable days only. (6-1)
SANTA MONICA ARPT: 16'' elevated lgts being installed both sides Rnwy 3-21. Rnwy 4-22 clsd. Rnwy 3-21 hazardous - const. (3-29)
THERMAL-RADIO: About June 6, omnirng will be commd. Freq: 114.3 mc. Ident: TRM. Lat 33-37-35, long. 116-09-45. (5-29)
[redacted]: COLORADO-SPECIAL NOTICE: Lndg of acft on highways in vcnty of John Martin Reservoir and Dam below Hasty Dam prohibited. Lndg of acft prohibited on Govt property in vcnty of John Martin Reservoir and Dam unless prior permission obtained from U.S. Army Dist Engr. John Martin Dam lctd 1 mi SSE of Hasty, Colo. (9-25)
★DENVER-RADIO: June 4, transmitter and rcvr 121.5 mc comm. These data rcvd too late for inclusion on ANRA page.
DENVER-AIR ROUTE TRAFFIC CONTROL CENTER: Soon transmitter and rcvr 120.3 mc will be commd. (5-18)
DENVER NAS (BUCKLEY FLD)-RADIO: Navy X-band Radar Bcn, code 2-1-1, inop. (4-26)
PUEBLO: Ordnance depot approx 17 mi E at lat 28-16-53, long. 104-18-09, conducting all types of demolition work 0800-1630 daily, Mon thru Fri, during month of June. (5-31)
THURMAN-RADIO: Omnirng will be shut down for a 15 min period between 1000 and 1100 each day. (5-22)
CONNECTICUT: BRIDGEPORT ARPT: Const ends Rnwys 6,11 and 16. First 1000' of these rnwy ends subject to closure with min notice. Equip on fld. (4-14)
E. HARTFORD-RENTSCHLER ARPT: VFR flgt test operns days all alts in 75 mi radius. (1-4) 80' crane 500' NW apch end Rnwy 4 days. (5-14)
HARTFORD-RADIO: Auto. rng monitor. discontd. (2-21)
NEW HAVEN ARPT: Ctn - use rnwys only. Exten const. Equip. on fld. Advance notice rqrd for ngt opern. June 10, 0800-2000 fld will be clsd to all acft xcpt scheduled carriers.(5-2)
WESTPORT SEAPLANE BASE: Clsd to all trans acft. No svcg avail. (6-1)
DELAWARE: DOVER AFB-RADIO: USAF rng gnd-checked only. Reliable for homing only.(12-12)

[redacted]: DOVER AFB: No svcg trans acft. (9-14)
FORT MILES: Overwater Controlled Firing Area in vcnty formerly approved on a seasonal basis, is now rqrd on a yearly basis. Area is described as follows: Beginning at lat 38-46-30,long. 75-01-24; SE to lat 38-43-00,long. 74-57-10;SSE to lat 38-38-50,long. 74-55-33; W to lat 38-37-54, long. 75-03-50; northerly along the shoreline at lat 38-40-45,long.75-04-09; NE to point of beginning. Time of Use: Jan to April 0800-1730, May to Oct 1300-1900, Nov to Dec 0800-1730. Activities: Anti-acft firing. Controlling Agency: 2nd Army, Ft. Miles,Dela. Effective Date: Jan 5, 1951.
WILMINGTON-RADIO: Z mrkr operg test-basis only. (5-16)
WILMINGTON-NEW CASTLE CO ARPT-TOWER: About June 13,CAA ILS will be shut down until approx June 18. Lclzr and glide path freq will be changed 110.1,334.4 mc, respectively.(6-1) FLD: Jets and other mil acft operg daily. Two 465' unlgtd bridge twrs being erected across Delaware Riv 4 mi ENE. (3-23)
[redacted]: ANACOSTIA NAS-RADIO: Navy VHF/DF inop- repairs. (4-30)
ANACOSTIA NAS: All pilots clearing to Anacostia NAS under IFR should be thoroughly familiar with all Washington area rdo and communs facs, the reporting points, all holding pats, and let-down procedures, inclg "TIMED APCHS". (11-1)
WASHINGTON-SPECIAL NOTICE: CAA regards Mt. Vernon National Monument as a congested area. In accordance with CAR 60.17 all acft should maint at least 1000' over Mt. Vernon, 10 mi SSW Washington National Arpt on W bank of Potomac River. Acft remain clear of U.S. Naval Medial Center, Bethesda,Md.,lat 39-00-30, long. 77-05-30.
WASHINGTON-RADIO-SPECIAL NOTICE: The following facs are to be used as an aid to any acft, military or civilian, that is known or believed to be in distress:
